Course Description:

This course is designed to provide the student with a general overview of past and present Mexican American culture and society. Using an interdisciplinary framework, this course examines ethnic Mexican identity formation from contact and conquest to the present. The course uses race, ethnicity, class, and gender as categories of analyses to interpret how and why ethnic Mexicans create distinct cultures and identities in the United States. The readings and videos explore a number of topics to include immigration, education, labor, politics, and pop culture for a better understanding of how ethnic Mexicans negotiate, resist, and redefine their place in the U.S.

By the end of the class, students will

1. Develop the critical thinking and analytical skills necessary for effective communication both orally and written.
2. Identify, analyze, and articulate the central themes in Mexican American community and identity formation.
3. Understand theories of race, class, ethnicity, and gender in the shaping of both geo-political and metaphorical borders.
4. Connect the past to the present in an effort to better understand the world around them.
5. View themselves as global citizens.
6. Develop their technology skills and learn to use software available for teaching and learning.
