Course Description

Painting 2301 is an introduction to the discipline of painting. You will learn basic techniques of acrylic and oil painting as well as a better understanding of the range and possibilities of painting as a means of expression. In the first part of this class you will be given specific assignments to help you develop the skills you need to paint. Building on the skills you have acquired in your Basic Drawing classes you will learn to see form and color more accurately and to translate that experience 2 dimensionally with paint.

To do this we will work through a series of quick, small paintings from still lifes and from nature to help you become familiar with oil paint and to focus on various techniques of mixing color and applying paint. You will be expected to work on paintings in class and at home. I will talk with you individually about your work and we will have weekly group crits.

In the second part of the term we will work on larger pieces addressing particular expressive concerns. You will be asked to respond to the work of contemporary artist and to think of your own work's position in contemporary visual culture. This

class will emphasize the development of your analytical skills and you will learn to meaningfully engage in critiques of your own and other students work.
