by Johnson and Al, Addison Wesley

Suggested: On-line resources.

Course Objectives (Learning Outcomes): This is a first course in Linear Algebra. This course will introduce the students to the theory concepts of matrix algebra and systems of linear equations, elementary vector space concepts, and the eigenvalue problem. The student will solve different types of exercises which involves matrices, using standard methods, proofs, connections with practical situations and/or using the technology.

The expected student learning outcome from this course is that students learn the material well enough to pass the course and to succeed in all math courses that require Matrix Algebra as a prerequisite.

Course Activities/Assignments: Additional information about the course will be available on the following web page:  
<http://www.math.utep.edu/Faculty/ampownuk/>

Assessment of Course Objectives: There will be homework, two midterms, and the final exam
