

GEOL 1103 (Lab for GEOL 1313): Intro to Physical Geology Lab Syllabus

Instructor/Lab Coordinator: Dr. Annette Veilleux, amveilleux@utep.edu, Geology Rm 101-C
Teaching Assistant: To be Assigned

Online Class

Course Schedule: Subject to change !

MODULE	DUE	TOPIC	QUIZ
Week One Module Jan 19 – Jan 22	01/31/21	Introduction to Course: Learning Blackboard and Earth's Systems	NO QUIZ
Week Two Module Jan 25 – Jan 29	02/07/21	Google Earth – Virtual Fieldtrip Assignment Due 02/07/21	Assignment NO QUIZ
Week Three Module Feb 1 – Feb 5	02/07/21	Minerals	NO QUIZ
Week Four Module Feb 8 – Feb 11	02/14/21	Rocks	Quiz 1
Week Five Module Feb 15 – Feb 19	02/21/21	Volcanic Hazards	Quiz 2
Week Six Module Feb 22 – Feb 26	02/28/21	Structural Geology/Crustal Deformation	Quiz 3
Week Seven Module Mar 1 – Mar 5	03/07/21	Earth's Interior	Quiz 4
Week Eight Module Mar 8 – Mar 12	03/14/21	Plate Tectonics I	Quiz 5
Week Nine Module Mar 15 – Mar 19		SPRING BREAK	NO QUIZ
Week Ten Module Mar 22 – Mar 26	03/28/21	Earthquakes and Hazards	Quiz 6
Week Eleven Module Mar 29 – Apr 2 Apr 1 Drop Deadline	04/04/21	Plate Tectonics II	Quiz 7
Week Twelve Module Apr 5 – Apr 9	04/11/21	Surface Water and Environmental Justice	Quiz 8
Week Thirteen Module Apr 12 - 16	04/18/21	Groundwater	Quiz 9
Week Fourteen Module Apr 19 – Apr 23	04/25/21	Water Resources and Measurement Techniques	Quiz 10
Week Fifteen Module Apr 26 – Apr 30	05/02/21	Deserts and Wind	Quiz 11
Week Sixteen Module May 3 – May 6	05/09/21	Climate Change	Quiz 12
Final Exam Week May 10 – May 14 No Final Exam for this class			

Labs available weekly Monday through Sunday, read the material.
Check email and announcements often for important information.
Submit assignments by Sunday 8:00 am.
Submit quizzes by Sunday 8:00 am.
Submit reflective summaries by Sunday 8:00 am.
No makeups, labs are due in one week by Sunday at 8:00 am, no exceptions.

Required Text: There is no required text for this class, all labs are developed by faculty or instructors; computer access is required for this course, see the netiquette section for details on computing requirements.

GEOL 1103 (Lab for GEOL 1313): Intro to Physical Geology Lab Syllabus

Instructor/Lab Coordinator: Dr. Annette Veilleux, amveilleux@utep.edu, Geology Rm 101-C
Teaching Assistant: To be Assigned

Computing resources available in the UTEP Library:

<https://www.utep.edu/library/about/library-hours.html>

GRADING: Grades will be based on the following criteria and will be assigned using this scale:

Assignments	60%
Quizzes	30%
Weekly Reflections	10%
Grading Scale:	A=90-100%, B=80-89%, C=70-79%, D=60-69%, F=<60%

ASSIGNMENTS Late work will not be accepted in the online format. You will have one week from the assigned date to complete your assignments, after that you must seek approval to turn it in late. Every effort will be made to align the lab course material with the associated lecture course, however at times will be covered out of sync with the lecture course.

LEARN AND USE BLACKBOARD

All labs are on blackboard and a students should become familiar with using this system. Refer to the following links for help with Blackboard:

<https://www.utep.edu/technologysupport/>

<https://www.utep.edu/extendeduniversity/cid/index.html>

CELL PHONE USE: Turn off your phone ringer while in class, when in class.

STUDENT CONDUCT AND PLAGIARISM

University guidelines for acceptable student conduct are very specific and will be strictly followed. Blind copying of intellectual material (text) from resources such as books, journals, and the internet is plagiarism and is illegal. Instead, you should write things in your own words with a proper reference to the source. If any exercises or labs require you to look up an answer in something else than the class textbook, we will expect you to reference the source and write it in your own words. Plagiarized work will receive a "0" for the whole assignment and cannot be redone or made up.

DROP POLICY

The course drop deadline is **April 1, 2021**. Non-attendance will **not** result in being dropped, but you will get zeros for the remaining work and likely fail the class. It is your responsibility to initiate withdrawal from the class.

STUDENTS WITH DISABILITIES

If you think you may have a disability or if you are experiencing learning difficulties, please contact the Center for Accommodation and Support Services (CASS) at:

<http://sa.utep.edu/cass/>

MILITARY STATEMENT

GEOL 1103 (Lab for GEOL 1313): Intro to Physical Geology Lab Syllabus

Instructor/Lab Coordinator: Dr. Annette Veilleux, amveilleux@utep.edu, Geology Rm 101-C
Teaching Assistant: To be Assigned

If you are a military student with the potential of being called to military service and/or training during the course of the semester, you are encouraged to let me know well in advance.

POLICY ON MAKEUP LABS

Online assignments are due in class one week after the lab normally this is assigned on a Monday and turned in by Sunday 8AM the following week. No late work will be accepted unless otherwise arranged ahead of time.

CONTACT INFORMATION

When emailing the instructor or TA you must include the section you are enrolled in as well as the time/date of your class along with your name.

INSTRUCTOR EMAIL amveilleux@utep.edu

OFFICE HOURS BY APPOINTMENT ONLY (915) 747- 5501

TEACHING ASSISTANT EMAIL

The teaching assistant is responsible for the class instruction, for questions contact:

TEACHING ASSISTANT OFFICE HOURS

Virtual office hours – Blackboard Collaborate – every Friday 1-3pm, online

Learning Objectives

1. Students will be familiar with Earth's Systems by creating a PowerPoint of an important cycle related to one of Earth's spheres.
2. Students will be able to identify common Earth materials and interpret their composition, origin, uses and relationship. This will be measured through a lab assignment on application of Earth materials and minerals.
3. Students will be able to describe the processes operating at and beneath the Earth's surface, how those processes create the Earth's landscape, and how humans affect and are affected by the processes with respect to volcanism and formation of igneous rocks.
4. Students will be able to describe the processes operating at and beneath the Earth's surface, how those processes create the Earth's landscape, and how humans affect and are affected by the processes involving volcanism.
5. Students will understand how and where different kinds of sedimentary and metamorphic rocks form and how this is important to interpret the history of the Earth.
6. Students will analyze and interpret the structures commonly found in geologic settings that inform geologists about Earth's history, processes and type of movement.
7. Students will infer relationships among abundances of different rock types to analyze the density variations found within the Earth and incorporate that into an understanding of the Earth's internal layers.
8. Students will synthesize information from divergent plate boundary types to unravel the nature and characteristics of divergent boundaries.
9. Students will interpret data from regional Texas earthquakes to understand the occurrence of earthquakes and how to analyze different types of earthquake information.

GEOL 1103 (Lab for GEOL 1313): Intro to Physical Geology Lab Syllabus

Instructor/Lab Coordinator: Dr. Annette Veilleux, amveilleux@utep.edu, Geology Rm 101-C

Teaching Assistant: To be Assigned

10. Students will synthesize information from transform and convergent plate boundary types to unravel the nature and characteristics of transform and convergent boundaries.
11. Students will learn about surface water by analyzing stream data, occurrences of floods in local areas and arroyos and identify associated features that will impact the landscape and how surface water behaves as it flows across the landscape.
12. Students will calculate their water footprint and analyze water data from well information to interpret conditions related to groundwater supply and usage.
13. Students will analyze images of White Sands dunes to infer processes at the surface and related to wind conditions.
14. Students will learn about climate change from tree ring growth and plot and interpret carbon dioxide data.
