Banksy. *Stop and Search*. 2007

A person's life can turn out better or worse depending upon the particular actions they choose to perform. Should I go to college? Should I become a parent? What career should I pursue? For whom should I vote in the next election? Should I use my expendable income to buy myself the new iPhone, or should I donate that money to famine relief in East Africa? Before we can decide what actions to take, we need to reflect upon (or *theorize* about) the kind of life that we want to live and the kind of person that we want to become. *Ethics* (or *moral philosophy*) is, in its most general form, the branch of philosophy devoted to the study of what constitutes the good life. This is a big topic that involves many different kinds of questions and concerns. In order to systematize the inquiry, philosophers typically divide ethics into the following four subfields:

i) *Metaethics* is the study of the meaning of moral concepts and judgments: What do the words *right* and *wrong* mean? Are moral judgments relative to a culture or are they universal? Is a person's standard of what is right or good simply a matter of opinion or are there objective facts that determine what is right or good?

ii) *Value theory* is the study of the values that ought guide our actions. Value theory attempts to discover principles according to which something is classified as good (or

bad). For example, should I do something that makes me (and those around me) happy or are there values other than happiness (e.g. truth, beauty, justice) that I should also take into consideration when deciding how to act?

iii) *Normative ethics* is the study of the principles (i.e. norms) according to which an action is determined to be right (or wrong). Normative ethics does not attempt to describe actual moral behaviour (that is the job of sciences like psychology, sociology and anthropology), rather normative ethics attempts to *prescribe* fundamental principles for moral behaviour. Here is an example of a famous principle that normative ethicists have attempted to justify: *An action is right if and only if it would, if performed, bring about at least as much overall happiness as would any available alternative action.*

iv) *Applied ethics* is the application of ethical theory to the analysis of moral problems that arise in particular spheres of human life. Subfields in applied ethics include: medical ethics (e.g. Is abortion morally permissible?), environmental ethics (e.g. Is the destruction of the rainforest in Borneo for the commercial production of palm oil morally permissible?), and business ethics (e.g. Should the government subsidize failing financial institutions with emergency loans?).

By the end of this course, we should 1) have a working understanding of the major figures in the history of ethics, including Plato, Aristotle, Hobbes, Kant and Mill, 2) understand the main problems and methods that define metaethics, value theory, normative ethics and applied ethics, and 3) what's most important, have learned to use ethical theory to critically examine and shape our own lives.

3. Additional readings posted on Blackboard under “Readings”.

4. PowerPoint lecture slides are available on Blackboard. You may download and print these to use for taking notes during lectures.

5. Paper and pen for in-class writing assignments.

6. Green Scantron forms for in-class quizzes (available at the University Bookstore).

COURSE REQUIREMENTS

1) **Surprise In-Class Reading Quizzes (10%)**: Each quiz will consist of several multiple-choice questions. Each quiz will be based on the reading material that is due on the day the quiz is given. In order to prepare for these quizzes, you must get in the habit of reading the assigned texts carefully twice before you come to class. Each quiz is worth 2% of your final grade.

2) **Blackboard Exams (50%)**: There will be four Blackboard exams. Each exam will be available on Thursday and due on Sunday. In order to prepare for these exams, you must 1) get in the habit of reading and re-reading the assigned texts carefully before you come to class, 2) take the practice quizzes that are available on our textbook publisher's website, and 3) participate regularly in class discussion. The exams may cover the assigned reading material (whether or not we discuss it in class) and/or class lecture and discussion (whether or not what we discuss in class appears in the assigned readings). Each exam will be given on Blackboard, and will have a time limit. Here is the exam schedule:

Exam #1 (10%): Available Sept. 21 and due by Sept. 24. On material from weeks 1-4.

Exam #2 (10%): Available Oct. 19 and due by Oct. 22. On material from weeks 5-8.

Exam #3 (10%): Available Nov. 16 and due Nov. 19. On material from weeks 9-12.

Exam #4 (20%): Available Dec. 7 and due Dec. 10. On material from weeks 1-15.

Note: Late exams will not be accepted.

3) **In-Class Writing Assignments (10%)**: Periodically throughout the semester I will ask you to write short in-class assignments, which you will turn in at the end of the class session. The assignments will be graded on a Credit/No Credit basis.

Note: If you fail to submit your assignment during class or if you are absent from class, you will receive no credit for the assignment.

4) **Essay Assignments (30%)**: You will write two 1000-1250 word essays on topics selected from a list of topics.

Essay #1 (15%): Topics available Oct. 9. Essay due Oct. 30.

Essay #2 (15%): Topics available Nov. 13. Essay due Dec. 4.

COURSE POLICIES

Classroom Conduct Code:

- The use of electronic devices (laptops, cell phones, audio recorders, etc.) is strictly forbidden.
- Arrive to class on time.
- Do not chat with fellow classmates during the lecture/discussion.
- I expect you to participate in class discussion on a regular basis. If you have a question or comment, raise your hand (and I will call on you).
- Treat your fellow classmates with respect at all times, including during class discussion.

Note: If you violate the Classroom Conduct Code, you will be asked to leave the class.

Attendance Check-In: Please check in before the start of class with your UTEP Miner Gold ID Cards. There are multiple readers outside of our classroom. To check in just swipe your ID card against the reader. The system will beep and the light on the reader will change color temporarily (red to green for less than a second) if you successfully check in. The card reader's color will not change to "green", the color will only flash green for less than a second and the system will beep. You can check in no earlier than 15 minutes before the start of class.

Academic Honesty/Plagiarism: Students who engage in scholastic dishonesty will be subject to disciplinary action as stated in the UTEP policy: <http://www.utep.edu/dos/acadintg.htm>.

Note: The Office of Student Conduct and Conflict Resolution will adjudicate all plagiarism cases.

Email: All class email correspondences will be conducted exclusively through the email address that you have listed with the university.

Blackboard: We will be using the Blackboard shell for our class throughout the semester. If you have not done so already, you should familiarize yourself with accessing Blackboard. I will be using Blackboard to post course materials, including the syllabus and quizzes.

Accommodations: UTEP seeks to provide reasonable accommodations for all qualified individuals with disabilities, including learning disabilities. This university will adhere to all applicable federal, state, and local laws, regulations and guidelines with respect to providing reasonable accommodations as required affording equal educational opportunity. It is the student's responsibility to register with The Center for Accommodations and Support Services within the first two weeks of classes, and inform the faculty member to arrange for appropriate accommodations.
