

Instructions for taking quizzes in Blackboard

You need to have a reliable and stable internet, and use a laptop or PC, because Blackboard is not well supported by cell phones or tablets. If you do not have these facilities, there are computers available for you to use in the UTEP library. Please use also Google Chrome or Firefox as your browser, otherwise you may get Blackboard issues. Please do not use the UTEP WiFi, because it may not be a reliable and stable source of internet. Instead, use the computers available for you in the UTEP library.

All quizzes are open book, and they are available on the appropriate dates specified in your course calendar on Blackboard, from 12:00 AM to 11:59 PM (MST), for you to open and post the pdf file of your solution on Blackboard. Once you open the quiz, you have exactly one hour to complete it and post the pdf file of your solution on Blackboard. If not, the corresponding grade will be counted as zero. No exception or excuse to this rule will be accepted.

No late work will be accepted.

Please note also that Blackboard does not accept multiple files, and you need to upload the pdf file of your solution (no matter in how many pages), all in one pdf file.

Important Note: E-mail submissions are not accepted. Any issue with Blackboard should be reported and resolved through the UTEP Technology Support by using the following link:

https://www.utep.edu/technologysupport/TSCenter/tsc_helpdesk.html

This is completely out of the instructor's hands.

Please note also that Blackboard is not well supported by images, and you need to post the pdf file of your solution on Blackboard.
