

**College of Health Sciences
Department of Public Health Sciences
Health Promotion Program Syllabus**

Course name:	<i>Introduction to Epidemiology</i>
Course no.:	HSCI 3311
Course CRN:	16843
Semester/year	Spring 2021: January 19st through May 6th 2021
Undergraduate credit hours:	3
Class location:	Online
Class meeting time:	Online (Mixed – Synchronous and Asynchronous)
Class instructors:	Dr. Gabriel Ibarra-Mejia
Contact method:	E-mail, phone, or scheduled video conference through Blackboard Collaborates
Office no. and phone:	Virtual Office in Blackboard https://blackboardlearn.utep.edu/ultra/courses/_121632_1/cl/outline
Phone:	(915) 747-7270 (voice mail)
Email:	gabmejia@utep.edu
Preferred contact method:	E-mail
Assigned TA:	Ms. Clarissa Gonzalez cgonzalez60@miners.utep.edu
Course description:	This course provides the students with an understanding of the basic concepts in epidemiology, the application of statistical tools, and biomedical information. Students interested or considering being involved in public health, public health education, community service, policy-related jobs, or pursue a research-related career should enroll in this course.
Course pre-requisites:	To register for this course, the student must have completed and passed the following prerequisite courses: HSCI 3308 (Disease Characteristics, Prevention, and Control), MATH 1320 (Mathematics for Social Sciences), and PSYC 1303 (Statistical Methods). For authorization, send an e-mail with personal academic information to gabmejia@utep.edu .
Required textbooks:	None required
Required and Supplemental readings:	Posted for each module in the Blackboard Learn Platform.
Course format:	The course has been modified to a fully online format, with a mix of synchronous and asynchronous formats. The course is delivered through the Blackboard Learn platform. To the extent possible, we will adhere to the Team-Based Learning method. TBL has shown to be effective in increasing comprehension and knowledge retention due to the employment of collaborative learning. Therefore, both individual and group work will be at the core of this course. Learning techniques will emphasize a critical thinking approach to learning. A critical thinking approach takes the view that a student's knowledge is not passively absorbed. In contrast with other learning techniques, critical thinking assumes students will create knowledge in their minds by actively thinking about the material. It is going to be crucial that students prepare for each lesson, reading and reviewing the material before engaging in lessons and assignments. Still not entirely sure about what critical thinking really is? Visit then the "The Critical Thinking Community," available at: http://www.criticalthinking.org/pages/defining-critical-thinking/766

	<p>By using these methods, students will apply the gained knowledge to solve common and practical problems in public health epidemiology. Because the course is designed to challenge students intellectually, therefore, students may be required to cover additional materials and conduct activities to complete assessments and assignments. Additional readings and assignments are as a springboard for all activities and discussions, and ALL course materials are testable. Additional, but not all resources, course material, readings, etc. will be made available through UTEP's Blackboard Learn system.</p> <p>Students are required to complete individual quizzes and group homework assignments, as well as graded group discussions. There will be a midterm and a final exam. Required meetings for lectures complement each module. Students will have access to online discussion boards and materials. Class materials and assignments will be released weekly, and the students will have the opportunity to complete all assignments by set deadlines. All class materials and assignments will comply with ADA standards. Course engagement is mandatory and will count towards attendance. Students will be required to access and read all materials. All interactions between the instructor and students will be carried by e-mail, Blackboard Learn platform, or instructor's virtual office hours. In exceptional cases, a telephone or through a video conference meeting.</p> <p>NOTE: GRADUATE LEVEL STUDENTS REQUIRE COMPLETION OF ADDITIONAL COURSE WORK. Check with the instructor for further details.</p>
<p>Course requirements:</p>	<p>Time commitment is essential to complete the course requirements. Students are expected to complete all in-class and online (Blackboard Learn) materials and assignments. It is also expected that students have a sufficient level of proficiency using Blackboard. Therefore, it is expected each will have the required technical tools and support to use and complete the online sections of the course, including a computer, internet access, and connectivity. If a student does not own a computer, check with the institution's resources and campus library to use a computer. Also, each student should have the knowledge and skills to use word processing, spreadsheet, visual media software, as well as the capacity to open pdf-type files and have sufficient proficiency in using Blackboard. Learning how to use other software such as SPSS or excel-type add-ins may be required. If students are not familiar with Blackboard, Learn, or other programs needed, contact UTEP's Technology Support for available training and specific questions at 915-747-4357 or helpdesk@utep.edu. Students are responsible for maintaining internet connectivity at all times while working on Blackboard Learn. Students will not be allowed to re-submit an assignment or quiz because of internet connectivity issues, NO EXCEPTIONS.</p>
<p>Major learning objectives (must be numbered)¹:</p>	<p>After completing the course, the student will be able to:</p> <ol style="list-style-type: none"> 1. Basic (demonstrated through individual and group activities): <ol style="list-style-type: none"> a. Describe the historical roots of epidemiologic thinking and their contribution to the evolution of the scientific method. b. Explain how ethical principles affect epidemiologic research. c. Use rates and proportions to numerically express the amount and distribution of health- and non-health related outcomes. d. Use the distribution of health-related outcomes in groups to generate hypotheses that might provide a causal explanation. e. Explain basic statistical and epidemiologic concepts of estimation, inference, and adjustment to establish an association. f. Explain how to use evidence of an association to make a judgment about whether an association is causal using the principles of contributory cause. g. Describe the basic epidemiologic study designs used to test hypotheses, identify associations, and establish causation. h. Apply the concepts of benefits, harms, and cost to a public health decision.

	<ol style="list-style-type: none"> i. Describe the concepts of measurement of test performance and be able to apply the concepts of testing and screening in different settings. j. Describe the broad applicability of epidemiologic methods to clinical and basic science as well as public policy. <ol style="list-style-type: none"> 2. Advanced (demonstrated through group activities): <ol style="list-style-type: none"> a. Analyze the evidence for and against a recommendation for intervention. b. Synthesize epidemiological methods to assess the strengths and weaknesses of assertions in the scientific literature and popular press. c. Evaluate the design of an epidemiologic investigation, demonstrating the ability to reconcile scientific validity and ethical sensitivity. d. Analyze a public health problem (e.g., investigation of a disease outbreak).
Course outcomes:/ competencies lined with NCHEC Health Education Specialist:	<p>After completing the course, the student will demonstrate the following learning outcomes/competencies:</p> <ol style="list-style-type: none"> 1. Assess needs, assets, and capacity for health education. 2. Conduct evaluation and research related to health education. 3. Work individually and within a group-setting to produce undergraduate-quality level reports. 4. Communicate effectively in written and electronic modes of communication 5. Serve as a health education resource person.
Assessment strategies:	<ol style="list-style-type: none"> 1. Individual quiz tests. 2. Weekly group homework activities (solving a complex question, problem, or scenario). 3. Weekly graded discussions (pending) 4. Midterm and final comprehensive exams. 5. Completion of service-learning hours associated with public health activities (pending)
Required materials:	<ul style="list-style-type: none"> • Handout available in Blackboard: “Principles of Epidemiology in Public Health Practice,” <i>Third Edition</i> - An Introduction to Applied Epidemiology and Biostatistics • Listed websites • Additional handouts • Videos and other media
Grading scale & criteria	<p>Completion of the course will require that the student fulfills the following:</p> <p>Grading scale:</p> <ul style="list-style-type: none"> • >90 % = A • 80-89% = B • 70-79% = C • 60-69% = D • <60% = F

Dropping the course, withdrawals, and incomplete:	Students may drop individual courses or completely withdraw from the University, and grades are based on when the actions are taken. Refer to the online Academic Calendar at www.utep.edu/calendar .
Grading policies for dropping the course, withdrawals, and incomplete:	<p>a) Student-initiated Drops It is the student's responsibility to officially drop a course that she/he no longer wishes to take. Failure to do so may result in a grade of "F" on the student's academic record. Athletes must receive permission from the Miner Athletic Advising Center before dropping a course. International students with F or J visas must receive permission from the Office of International Programs before dropping a course.</p> <p>b) Administration Drops</p>

During registration periods for upcoming semesters, students will be dropped from registered courses for failure to meet prerequisites or co-requisites after final grades have been posted for the current semester and before the beginning of late registration for next semester. A student may petition the department chair of the course in question for a prerequisite or co-requisite waiver.

At the discretion of the instructor, a student may be dropped from a course because of excessive absences or lack of effort. Students may also be administratively withdrawn from a course during the semester for other reasons, with the concurrence of the academic dean or department chair. A grade of "W" will be assigned before the course drop deadline and a grade of "F" after the course drop deadline. A grade of "F" received due to disciplinary action imposed by the University overrides a grade of "W" received through a student-initiated or faculty drop. Students will be notified of their drop through their UTEP e-mail account.

c) Grade Assignment for Drops and Withdrawals
 Grades will be assigned as follows when a student drops a course or completely withdraws from the University:

1. If a student drops a course before the official census date of a semester, neither the course nor a grade will appear on the student's academic record.
2. If a student drops from a course after the census date, but before the student-initiated course drop deadline listed in the Class Schedule, a grade of "W" will be assigned.
3. If the student drops after the student-initiated course drop deadline, instructors will determine a grade of "W" or "F" for each course. A grade of "W" is considered only under exceptional circumstances and must be approved by the instructor and department chair for the course. A student may petition for a grade of "W" in writing with the necessary supporting documentation.

d) Incomplete course work
 An "I" (incomplete grade) can only be considered if requested by the student in advance of the conclusion of the course and only for legitimate, documented emergencies. Failure to request and negotiate the terms of an "Incomplete" grade before the conclusion of the course will result in denial except in the most extraordinary circumstances.

Course/Instructor & Institutional Policies

Attendance:

Although attendance is an essential component of this course and information not contained in the textbook will be presented during class through lectures and discussions, there will be no rollcall or taking attendance. However, not being in class every time and on time will significantly affect final grades since quizzes will be available only during the first 20 minutes of the class when in synchronous format. Therefore, we recommend:

- a) Attend all scheduled synchronous classes and be punctual (no later than 15 minutes after scheduled time start).
- b) Avoid being late to class; students are discouraged from coming to class late or leaving early since this is disruptive to the instructor and, more importantly, to classmates. Furthermore, each time a student is late, he/she will miss the graded activities without the possibility of making up for them or rescheduling.
- c) Absences will affect the final score/grade. Each time a student is absent, he/she will miss the graded activities without the possibility of making up for them or rescheduling.
- d) Students will **only** be able to make up for activities, exams, or assignments (scheduled or unscheduled) in the case of University excused absences (sponsored activities approved by the Dean of students). Must turn-in appropriate proof justifying absence within one week of the event.
- e) Active student participation in this course is critical. Students must be prepared before every class every week. During scheduled synchronous meetings, students

	<p>must be prepared to engage in instructor and student-lead discussion, formulate and answer, and in general, be actively engaged in all course activities. Participation can also be tracked through the completion of assignments/activities, total time spent online accessing Blackboard materials, etc.</p>
Course etiquette:	<p>As we know, sometimes, communication online can be challenging. It is possible to miscommunicate what we mean or to misunderstand what our classmates mean, given the lack of body language and immediate feedback. Therefore, please keep these netiquette (network etiquette) guidelines in mind. Failure to observe them may result in disciplinary action.</p> <ul style="list-style-type: none"> ○ Always consider the audience. This is a college-level course; therefore, all communication should reflect polite consideration of other's ideas. ○ Respect and courtesy must be always provided to classmates and to the instructor. No harassment or inappropriate postings will be tolerated. ○ When reacting to someone else's message, address the ideas, not the person. Post only what anyone would comfortably state in a face-to-face situation. ○ Blackboard is not a public internet venue; all postings to it should be considered private and confidential. Whatever is posted on in these online spaces is intended for classmates and professors only. Please do not copy documents and paste them to a publicly accessible website, blog, or other space.
Communication and feedback plan:	<p>E-mail is the best method to approach the instructor for when having questions regarding the course materials (gabmejia@utep.edu). The instructor or TA will usually reply within 24 hours. In the e-mail, please type in the subject line "Epidemiology Course," and in the message explain in complete sentences the question or problem you may have. A phone or video conferencing appointed can be set up if needed.</p>
Student progress:	<p>Grades and feedback on grades will be available through Blackboard Learn Grade Center. Additional feedback may be sent from the instructor by e-mail.</p>
Reading assignments:	<p>All assigned readings need to be completed before coming to the next scheduled class session. Example: the reading assignments for week 2 need to be completed before coming to the week 2 class session.</p>
Quizzes or readiness assurances tests:	<p>One individual quiz test and group homework assignment will be given every week. Each is worth a maximum of 10 points. There will be a limited time and deadline to complete the quizzes, and exams. Group homework assignments and discussion entries will be due by a deadline date. Scores will be posted after due dates in the Blackboard Learn Grade Center section. <i>The lowest grades on quizzes will be dropped, and only 10 quiz grades will be counted towards your final grade.</i></p> <p>Absences are not an excuse to miss quizzes or other graded activities. Except in the cases of University-approved absences, there will be no rescheduling or retaking of quizzes. In such cases, arrangements need to be made with the instructor and complete before the scheduled date. In the case of group activities, the student that does not contribute to complete the activities will not receive a grade for it.</p>
Discussion board posts:	<p>A section on Blackboard will be set up for general discussion topics. These will be and accessible throughout the semester. The purpose is to include discussion interactions between all those involved in the course.</p>
Group work:	<p>Nowadays, collaboration is a highly regarded skill. Groups will be assembled during the first week of the course. During this period, students will not be given the option of freely assemble. The instructor will assign students to groups at random. The maximum number of members in a group is six (6). <i>Please avoid including yourselves in a group to which you have not been invited and accepted.</i></p> <p>Although group work should be equally distributed, each group will appoint a "Group Leader" who will be the liaison between the group and other groups and the instructor. This does not apply to single-member groups. When completing a group assessment, the score</p>

	will be the same for all members. However, at the end of the course, each group member will complete a peer evaluation in which students will evaluate and rank a member's participation to receive proper merit in the form of extra credit points. Changing groups, dropping, or joining others are allowed only under extraordinary situations.
Writing standards:	<p>Please check your work for misspelling, grammar, and sentence structure before submitting assignments. References in written reports should follow the Publication Manual of the American Psychological Association (APA Style) 7th ed. https://owl.purdue.edu/owl/research_and_citation/apa_style/apa_style_introduction.html</p> <p>All written documents should be double spaced, 1-inch margins, and Times New Roman font size 12. Please feel free to seek out assistance from the UTEP Writing Center or other writing support. The UTEP Writing Center is free, and they are very helpful. Alternatively, you can also consult the Purdue Online Writing Lab (https://owl.purdue.edu/writinglab/the_writing_lab_at_purdue.html)</p>
Late assignments:	Due dates for homework, individual and group assessments, group activities, and exams are designed for fairness to all students. No exceptions to those dates will be made except in cases of university-designated closures. All assignments are due on the due date. Late assignments will be received up to one week after the deadline. However, a 10% of total point-value will be deducted for each day an assignment is late (including weekend days).
Permission to record lectures & discussions:	Not permitted without the express permission of the instructor.
Test proctoring software:	<p>Major course assessments (midterm and final exams) will make use of Respondus LockDown Browser and Respondus Monitor inside of Blackboard to promote academic integrity. You are encouraged to learn more about how to use these programs before the first test.</p> <p>Please review the following guidelines:</p> <ul style="list-style-type: none"> • The assessments will only be available at the times identified on the course calendar. • You may take the test at any time during the 24-hour window. • A reliable Internet connection is essential to completing the exam. If you must go to a location to take the exam (such as the library), be sure to follow their health and safety requirements. • You have 1 attempt to take the test. Once the time window closes, your answers will be saved, and no changes can be made. The higher score will be recorded. • Respondus Lockdown Browser will require that all internet tabs are closed before the start of the test. • Respondus Monitor requires a webcam and microphone. • You will be required to show the webcam your student ID before the start of the test. • Your face should be completely visible during the test. Blocking the camera will disable the test. • No notes or textbook materials are permitted during the test. Respondus Monitor requires you to take a video of your surrounding area (desk, chair, walls, etc.) • You should not have conversations with other people and/or leave and return to the area during the test.
Plagiarism detecting software:	Some of your course work and assessments may be submitted to SafeAssign, a plagiarism detecting software. SafeAssign is used to review assignment submissions for originality and will help you learn how to correctly attribute sources rather than paraphrase.

Copyright statement for course materials:	All materials used in this course are protected by copyright law. The course materials are only for the use of students currently enrolled in this course and only for the purpose of this course. They may not be further disseminated.
Instructor and course evaluation:	The instructor will provide more details on how the course will be evaluated. There are an internal evaluation and a University standard online evaluation in which you will have the opportunity to rate the instructor's performance and the course content. It is recommended that you complete these evaluations so that we continue improving the course.
Accommodations for individuals with disability:	<p>The University is committed to providing reasonable accommodations and auxiliary services to students, staff, faculty, job applicants, applicants for admissions, and other beneficiaries of University programs, services and activities with documented disabilities to provide them with equal opportunities to participate in programs, services, and activities in compliance with sections 503 and 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act (ADA) of 1990 and the Americans with Disabilities Act Amendments Act (ADAAA) of 2008. Reasonable accommodations will be made unless it is determined that doing so would cause undue hardship on the University.</p> <p>Learn more here: UTEP Center for Accommodations and Support Services</p> <p>If you have a disability and need classroom accommodations, please contact The Center for Accommodations and Support Services (CASS) at 747-5148, or by e-mail to cass@utep.edu, or visit their office located in UTEP Union East, Room 106. For additional information, please visit the CASS website at www.sa.utep.edu/cass.</p>
COVID-19 Accommodations:	Students are not permitted on campus when they have a positive COVID-19 test, exposure, or symptoms. If you are not permitted on campus, you should contact me as soon as possible so we can arrange necessary and appropriate accommodations. For more information, visit: https://www.utep.edu/resuming-campus-operations/testing/?home
Field trips:	There are no scheduled field trips in this course. However, there is always the possibility of outside activities, weather permitting.
Copyright and fair use requirements:	The University requires all members of its community to follow copyright and fair use requirements. You are individually and solely responsible for violations of copyright and fair use laws. The University will neither protect nor defend you on or assume any responsibility for a student violations of fair use laws. Violations of copyright laws could subject you to federal and state civil penalties and criminal liability, as well as disciplinary action under University policies.
Student conduct and scholastic dishonesty:	Students are expected to be above reproach in all scholastic activities. Students who engage in scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and dismissal from the University. "Scholastic dishonesty includes but is not limited to cheating, plagiarism, collusion, and the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another student, any act designed to give an unfair advantage to a student or the attempt to commit such acts." Regent's Rules and Regulations , Part One, Chapter VI, Section 3.2, Subdivision 3.22. Since scholastic dishonesty harms the individual, all students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced. From the UTEP Dean of Student Affairs (http://studentaffairs.utep.edu/Default.aspx?tabid=4386), "It is an official policy of University that all suspected cases or acts of alleged scholastic dishonesty must be referred to the Dean of Students for investigation and appropriate disposition. Any student who commits an act of scholastic dishonesty is subject to discipline. Scholastic dishonesty includes, but is not limited to cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to

	<p>another person, taking an examination for another person, any act designed to give an unfair advantage to a student or the attempt to commit such acts".</p> <p>Examples of "cheating" include:</p> <ul style="list-style-type: none"> • Copying from the homework, in-class work, or exam paper of another student, engaging in written, oral, or any other means of communication with another student during an exam or homework assignment, or giving aid to or seeking aid from another student during a test. • Possession and/or use during an exam or home test of materials which are not authorized by the person giving the test, such as class notes, books, or specifically designed "crib notes". • Using, obtaining, or attempting to obtain by any means the whole or any part of the non-administered test, test key, homework solution, or computer program; using a test that has been administered in prior classes or semesters but which will be used again either in whole or in part without permission of the instructor, or accessing a test bank without instructor permission. • Collaborating with or seeking aid from another student for an assignment without authority. • Substituting for another person, or permitting another person to substitute for one's self, to take a test. • Falsifying research data, laboratory reports, and/or other records or academic work offered for credit. <p>"Plagiarism" means the appropriation, buying, receiving as a gift, or obtaining by any means another's work and the unacknowledged submission or incorporation of it in one's own academic work offered for credit or using work in a paper or assignment for which the student had received credit in another course without direct permission of all involved instructors. NOTE: This includes cutting-and-pasting and photocopying from online and other material.</p> <p>"Collusion" means the unauthorized collaboration with another person in preparing academic assignments offered for credit or collaboration with another person to commit a violation of any provision of the rules on scholastic dishonesty.</p>
<p>Student resources:</p>	<p>UTEP provides a variety of student services and support. Familiarize yourself with the bookmarks on the right-hand side of the Blackboard student portal (visible before entering into a course) as well as the resources below.</p> <ul style="list-style-type: none"> • If you have personal issues and require assistance, counseling services and resources are available online and in-person through the Division of Student Affairs. You can access these services online (http://sa.utep.edu/counsel/), by phone (747-5302) or in person. <p style="text-align: center;">Counseling Center 202 Union West El Paso, Texas 79968</p>

- UTEP Library: Access a wide range of resources, including online, full-text access to thousands of journals and eBooks plus reference service and librarian assistance for enrolled students.
- RefWorks: A bibliographic citation tool; check out the RefWorks tutorial and Fact Sheet and Quick-Start Guide.
- University Writing Center (UWC): Submit papers here for assistance with writing style and formatting, ask a tutor for help and explore other writing resources.
- Math Tutoring Center (MaRCS): Ask a tutor for help and explore other available math resources.
- History Tutoring Center (HTC): Receive assistance with writing history papers, get help from a tutor, and explore other history resources.
- [Military Student Success Center](#): Assists personnel in any branch of service to reach their educational goals.
- [Center for Accommodations and Support Services](#): Assists students with ADA-related accommodations for coursework, housing, and internships.
- [Counseling and Psychological Services](#): Provides a variety of counseling services including individual, couples, and group sessions as well as career and disability assessments.

UPDATED COURSE SCHEDULE*

Dates	Topics	Course activities
Course introduction: Week 1	<ul style="list-style-type: none"> • Welcome • Course details, outcomes, and expectations • Team building 	<p>Readings:</p> <ul style="list-style-type: none"> • Course introduction and overview • Course syllabus and organization • Review of Blackboard Learning Platform <p>Assignments:</p> <ul style="list-style-type: none"> • Complete pre-course examination
Module 1: Week 2	<ul style="list-style-type: none"> • Lesson 1: History, Philosophy, and Uses of Epidemiology 	<p>Readings:</p> <ul style="list-style-type: none"> • Assigned readings (Blackboard) <p>Assignments:</p> <ul style="list-style-type: none"> • Complete weekly quiz • Complete weekly group activity
