
Preliminary Syllabus

Instructor: Dr. Giulio Francia **Phone:** (915) 747-8025 **Email:** gfrancia@utep.edu

Office: Biological Sciences Bldg Rm: 5.144 **Class Meets:** MW 1430-1650 UGLC 336

Office Hrs: M 16:50-17:50 pm or by appointment (Except during University Holidays)

What will you learn: In this course, you will learn the basis of Cancer Biology. Students will also be given a variety of examples of how academic research is helping us understand how cancers evolve, and how to treat them. At the end of this course you will have gained an understanding of the Cellular and Molecular Biology of Cancer. With the agreement of the instructor, a number of Class Modules/Subjects, and a number of exams, may be substituted by coursework assignment and oral presentations.

Keep in mind that the level of your success as an individual student is largely dependent on **your** effort. I highly encourage your active participation. Grades will be awarded based on your performance, with no additional/extra credit or grade negotiation.

Required Materials:

Textbook: I will to some extent follow the materials presented in the book on the right. However, it is not necessary to have the book to complete this course.

Title: *The Biology of Cancer*

Author: Robert A. Weinberg

Edition: 1st

ISBN-10:0815340761

Important - All the material to be covered in class will be posted on the Blackboard. You are expected to read any posted material before class, so check the Blackboard regularly for updates. Exam dates, and Exam details, will be confirmed on the Blackboard. It is your responsibility to check the Blackboard for the Exam dates, and for Exam details.

Course Grading: *Final grades in the course will be determined using scores on quizzes, exams, coursework, presentations, and attendance only. No extra credit assignments be given (please do not ask). Final grades are not based on a curve. You will receive a grade that is reflective of the effort you put in, what you learned, and the skills acquired during the course. You **earn** your grade; I don't give you a grade.*

- I. **Quizzes: THERE WILL BE FREQUENT QUIZZES.** So, class attendance is strongly recommended. There will be a quiz given at the start, middle or at the end of every lecture that will also serve as a record of attendance. In other words, there may be an unlimited number of quizzes during the lecture.

NOTE: *Anyone caught cheating will receive a zero for all quizzes and will be reported to the Dean of Students for academic dishonesty (cheating will show up on transcripts).*

II. **Exams:** **** NO ZEROES WILL BE DROPPED ****

Two in-class exams and a two final exams will be offered. Each exam, except for the final exams, will cover specifically the topics dealt in the classes that preceded the test up to the previous test, but not including the material already tested. The final exams will cover all the content covered during the semester. See the tentative class schedule for the precise date of all the exams. Students must bring a new green scantron for each exam, including the pre-test. If an exam is missed for inevitable and justified reasons, a make-up may be granted on a case-by-case basis. Otherwise, there will be **NO MAKE-UP EXAMS IN THIS COURSE**. If you know ahead of time that you will not be available to take an exam, notify me and I will schedule for you to take another exam one or two days before the scheduled date. However, you will have a different exam from that offered to the rest of the class. If you miss an exam and cannot provide justification, then you will get a zero in that exam.

Take-home exams – These will be given out during the semester, and may involve you preparing a scholarship application. It is important that you tackle these INDIVIDUALLY (i.e. by yourself). These exams will be scored according to their brevity, content, clarity, and their scientific accuracy. You should note that practically all the world's scientific literature is written in English, and that most grants are written in English; good scientific writing skills are therefore an essential component of modern science. Plagiarism is severely punished by the university and may provide grounds for dismissal. That is why, in fairness to you colleagues you will be asked to submit your exams as a word file (you may also submit a pdf copy, together with the word file, if you wish.).

Oral presentations – Each student will be required to give a short oral presentation in class. Additional details will be posted on the Blackboard.

Self-Assessment – Towards the end of the course I will ask you to assess your own participation in the class. This self-assessment score will be revised by me according to my own perception of your participation (and your contribution) to the class.

III. **Review Sessions:** There will be **NONE**. Questions should be addressed in class or during office hours.

IV. **Grading System:**

Course organization and grading

Attendance to lectures is mandatory. The weight of each assessment towards your final grade is shown below. Grading is on a straight scale: A (90-100), B (80-89), C (70-79), D (60-69), F (below 60).

Notes:

- 1 The Pre-test is designed to help you focus on the course. You do not have to prepare for it, and it will not affect your grade. Your participation in the pre-test will, however, affect how I judge your class participation, and your self-assessment score.
2. Exam A will count 10% towards your grade, and Exam B will count 20%.
3. Final Exams I and II will each count 10% towards your final grade.

Pretest	0%
Exams (A + B)	30%
Participation	10%
Take Home (Scholarship)	20%
Self Assessment	5%
10-min. Oral Presentation	25%
Final Exam (I and II)	20%

(You will be asked to give 3 minute presentations in class. These presentations will be scored for their clarity and for their scientific content. If you obtain a higher score in your presentations than in your Exams, I will allow the higher score to count towards your grade)

Class Policies:

I. Exams:

- ✓ Arrive on time to the exam. Anyone arriving after the first exam is turned in will not be allowed to take the exam!
- ✓ Go to the restroom before exam! Anyone requesting a restroom break will be asked to empty **and** pull out all pockets and may be accompanied by a TA.
- ✓ You will never need a calculator for an exam in this class so put them away.
- ✓ Place **all electronic devices** (turn cell phones off) in your purse or backpack. Absolutely nothing electronic allowed on your desk during an exam. Violating this rule will not be tolerated. *Only* a #2 pencil, an eraser, your scantron and exam are allowed on your desk during an examination.
- ✓ All personal items (backpacks, purses, etc) must be placed at the front of room upon entrance.
- ✓ No headphones allowed under any circumstances!
- ✓ Baseball caps or any sort of hat with a brim must be removed.
- ✓ Try not to disrupt those around you after you finish an exam.
- ✓ No sharing of pencils, pens, erasers. You are to share nothing during an exam.
- ✓ **No talking or joking** during an exam.
- ✓ No cheat sheets (these will earn a trip to the Dean of Students to explain yourself).
- ✓ No looking around at exams of others sitting near you.

II. Grading: Exams will be graded the same day of the exam and scores will be posted on Blackboard later that evening, or as soon as the marking is complete. Due to time restraints, it is not possible to go over the exam in class but you are more than welcome to look over your exam during office hours or by appointment. *All exams must stay in my office at all times.* Grades are earned on exams, quizzes, and attendance *only*. There will be **no** extra credit assignments (i.e. reports) so do not ask for these. If you are having problems, please come see me immediately. **DO NOT wait until the end of the semester when it is too late.**

III. Attendance: Class attendance is **MANDATORY**. The only exceptions are university recognized excuses for absence. Attendance will be taken routinely in the form of a daily quiz. Students are responsible for attending lecture regularly and knowing what takes place during classes. This includes: material covered during lecture, announcements, handouts, changes in the syllabus, etc. If you *must* miss a class, you need to make a special effort to learn what occurred during

your absence. You are adults and you are paying tuition for this course. It is up to you to determine whether you need to be here or not. Keep in mind that the activities conducted in class cannot be made up at a later date. Also, keep in mind that exams will be based on the material covered in class.

- IV. Courtesy:** Be respectful not only to your instructor, but to your fellow classmates as well. Please place all cell phones on vibration or silent mode prior to class and do not answer them while in class.
- V. Withdrawing from the course:** The last day for you to withdraw from any course with an automatic "W" is **April 5th**. Please note that it is the student's responsibility to officially withdraw from a course before the drop deadline. A grade of incomplete is issued by the instructor when a student has completed most of the course work, has a good reason for not completing the course work, has a good chance of passing, and the instructor agrees to the grade of I. A grade of "I" will never be given to "make-up" or repeat the entire course.
- VI. Academic Dishonesty:** Suspected cases or acts of alleged scholastic dishonesty (Cheating) will be automatically referred to the Dean of Students' Office. It is the policy of the University of Texas at El Paso that academic dishonesty is a completely unacceptable mode of conduct and will not be tolerated in any form. All persons involved in academic dishonesty will be disciplined in accordance with University regulations and procedures.
- VII. Accessibility/Disabilities:** If you have, or suspect you have, a disability and need accommodations you should contact Disabled Student Services Office (DSSO) at 747-5148 or at dss@utep.edu or go by Room 106 Union East Building. If you are a student with a disability (physical, learning, etc), please notify me at the beginning of the semester so that accommodations can be made for you as soon as possible.

Tentative Class Schedule: *Please be aware that this schedule is subject to change! Check the Blackboard regularly for updates or alerts.*

Date	Lecture	Reference
Monday, Jan 28	Introduction Part I	Chapter 1
Monday, Feb 4	Introduction Part II+Pre-test	Chapter 2
Monday, Feb 11	Viruses and cancer + Oncogenes	Chapter 3 Chapter 4
Monday, Feb 18	Tumor suppressor genes + Cell cycle	Chapter 7 Chapter 8
Monday, Feb 25	Metastasis	Chapter 14
Monday, March 4	Class Presentations	
Monday, March 11	Exam A	
Monday, March 18	No CLASSES	
Monday, March 25	p53, guardian of the genome + Angiogenesis	Chapter 9 Chapter 13
Monday, April 1	Signal transduction + Growth factors and cancer	Chapter 6 Chapter 5
Monday, April 8	Exam B	
Monday, April 15	Tumorigenesis + Multistep carcinogenesis	Chapter 10 Chapter 11
Monday, April 22	Genome integrity + Cancer therapy I	Chapter 12 Chapter 16
Monday, April 29	Cancer therapy II + Immunology and cancer	- -
Monday, May 6	Cancer Research + Translational cancer research	- -
Monday, May 13	Final EXAM	-
