

GENERAL CHEMISTRY LAB II SYLLABUS

CHEM 1106 UTEP

SPRING 2024

Instructors of Record:

Dr. Brenda Torres

btorres2@utep.edu

Dr. Patricio Del Castillo

hpdelcastil@utep.edu

Dr. Hemant Sharma

hsharma@utep.edu

COURSE DESCRIPTION

UTEP CHEM 1106 is the second semester General chemistry laboratory. This course provides a continuation of the study of the fundamental principles and laws of chemistry. These concepts include but are not limited to polarity, colligative properties, spectrophotometry, quantitative aspects of chemical kinetics, equilibrium, acids and bases, thermodynamics, electrochemistry and quantitative analysis.

The objectives of this course are as follows:

- Anticipating, recognizing, and responding properly to hazards in laboratory procedures and managing chemical wastes.
- Using appropriate personal protective equipment to avoid unwanted exposure to chemicals.
- Determine the order of a chemical reaction.
- Perform equilibrium constant calculations for chemical reactions.
- Construct pH titration curves for the titration of both monoprotic and polyprotic acids.
- Apply Le Chatelier's Principle to chemical systems at equilibrium.
- Calculate the equilibrium constant based on thermodynamic data.
- Calculate the molar mass of an unknown substance based on the colligative properties.

REQUIRED MATERIAL

- General Chemistry Lab Manual 1105/1106
ISBN 978-1-5339-2706-4 (Available at UTEP Bookstore)
- Access to the Labster platform: You will receive an invitation to join Labster platform by email. You can choose to pay by credit card or enter the voucher code that you purchased from your school bookstore.
- Chemical Splash goggles and Lab coat.
- Scientific calculator.
- A webcam and microphone are required. Webcam and mic can be built into your computer or can plug in to your computer with a USB cable.

USE OF RESPONDUS LOCKDOWN BROWSER

This course requires the use of LockDown Browser and Monitor for online exams to ensure fairness in testing. You will be required to show an approved picture ID to verify your identity and you will be recorded as you take your exam to ensure you are following testing requirements and procedures.

- A webcam and microphone are required. Webcam and mic can be built into your computer or can plug in to your computer with a USB cable. Respondus software doesn't allow you to turn off the microphone, any sounds in your environment will be recorded. Avoid talking to yourself or aloud.
- Dress code while taking an exam: Please wear proper attire while taking an exam as you will be recorded. Dress as you will be dressed when attending school.
- You must be alone in the room or area where you are taking the exam.
- Don't use earpods or headphones while taking the exam.

- During the environment check please make sure I can see the desk, your formula packet, calculator, and the immediate area to your desk and chair.
- Your images and videos will remain secure on the Respondus server and will be seen only by me, your instructor, and the T.A designed for your lab section. If the image/video shows evidence of cheating, it will be submitted to the Dean of students for disciplinary action.
- Respondus flags suspicious behavior and calculates face detection time while you take your exam and allows me to view the data in Blackboard.
- Allowed materials when taking an exam: Formula packet and calculator are allowed when taking an exam, please show these items to the camera.
- LockDown Browser must be downloaded to your computer or device before testing. You will only have to download it once. The app is also available for iPad; download from the App Store.
- Failure to comply with guidelines, expectations, and procedures will result in a zero (0) on the exam.
- Once you take the exam, the grade will be displayed on the screen; however, this grade is pending until I review the recorded videos. I will post your grade within 3 days after you take the exam.

SAFETY

Chemistry laboratories can be hazardous if the rules are not followed. Most accidents that occur in the chemistry laboratory are a result of carelessness, impatience, unauthorized experimentation, and disregard for safety rules.

Laboratory Apparel

- **Splash goggles are required in the laboratory AT ALL TIMES!** Splash hazards are perhaps the most significant danger present in the lab, and eyes are extremely sensitive.
- Laboratory coats must be donned at all times.
- Sandals, open-toed shoes and high heels are not permitted in the lab.
- Shorts are not permitted in the lab, long pants and long sleeves are mandatory. Your clothing will be your protection from direct exposure of the skin to chemical splash.

- Long hair is to be constrained. Long hair is subject to fire and contact with chemicals.
- No iPod neither cell phone will be permitted in the laboratory at any time.

Safety Equipment

- Identify all of the laboratory safety equipment and their location: the fire extinguisher, the emergency eyewash stations, the fire blankets, and the safety shower.
- Safety Data Sheets (SDS's) are available to you on request only.

ATTENDANCE

Attendance is mandatory. You are expected to be on-time and ready for lab at the beginning of each lab period.

If you miss an experiment, there will be no make-ups available, if you have an emergency (you need to show proof) or a university-sanctioned event, contact your instructor of record.

LAB RULES

- Upon entry to the lab, students must be properly attired, including splash goggles.
- Once everyone is admitted into the lab, the TA will give a presentation to inform students about lab procedure, materials and safety hazards.
- All lab reports are due at the end of the lab period unless otherwise specified. Data sheet or spreadsheets are to be complete in the lab, following the instructions provided during the lab period.
- The student is responsible for cleaning the workspace and any assigned lab areas before leaving the lab.
- Failure to follow the Lab rules will affect student grade

PRE-LABS AND REPORTS

Pre-Lab preparation is the key to success, and the student must understand laboratory experiments thoroughly before starting the chemical experiments.

The experiments will be shown in videos on the Blackboard platform, presenting details on how the experiments have to be conducted.

Embedded in the videos are some questions that need to be answered, those questions are aimed at understanding the laboratory procedure and will be graded.

Lab reports will reflect precision and detailed observation concluding the assigned experiments; there may be additional questions to be answered at the end of the report form.

If the student doesn't complete the prelab or lab report, the student will get a zero in those assignments.

LABSTER SIMULATIONS

Labster is a platform for virtual labs and science simulations.

Students will apply knowledge gained in hands-on labs to solve a real-world problem within the context of a story. Within the 3D environment of an immersive simulation, students master theory aligned with the curriculum, interact with advanced equipment, learn techniques, and conduct experiments.

The Labster simulations will reinforce and **complement** the concepts learned in the hands-on lab.

The missed simulations cannot be make up.

FINAL EXAM

The final exam will cover the concepts learned in the laboratory and will consist of short answer questions and questions based on calculations.

The final exam will be deployed the last week of classes, and it will last one hour. You are required to take the exam using Respondus LockDown Browser.

COURSE EVALUATION

The final grade is based on a points system: as described in the table below.

Your lab report grade encompasses many factors. Your TA or instructor can deduct points if you appear poorly prepared, do not follow instructions, do not comport yourself well in class, fail to follow safety requirements (such as failing to wear splash goggles), or fail to clean up your work area.

The percentage of points you get out of the possible 460 points will determine your final grade for the lab.

Assessment Items	Points	Due Date
12 Labster simulations 	10 points each = 120	Week of the experiment on Sunday at 11:59 P.M. Late simulations are NOT accepted.
10 Pre-Labs 	10 points each= 100	Online Pre labs are due the day before the hands-on lab at 11:59 P.M. Late pre-labs are NOT accepted.
10 Lab reports 	20 points each= 200	Lab reports must be completed and submitted before the lab session ends. Make-up labs are NOT allowed.
Final exam 	20 points= 20	Final exam is online on Blackboard platform.
Syllabus quiz	10 points= 10	After the welcome session
Laboratory Rules and Procedural Agreement	10 points= 10	After the welcome session
TOTAL POINTS	460	Grades will be calculated according to the points obtained during the term.

Final Grade	Points	% Required
A	414-460	90%-100%
B	368-413	80%-89%
C	322-367	70%-79%
D	276-321	60%-69%
F	<275	<59%

ACADEMIC DISHONESTY

The expectation for all students in this course is that complete integrity will be demonstrated at all times.

UTEP rules will be strictly enforced, academic dishonesty including but not limited to cheating, plagiarism, data falsification will not be tolerated. Minor incidences will result in a score of zero for the lab period and recurrence will result in the failure of the course.

Please review the UTEP Academic Integrity Policy in the following link <https://www.utep.edu/hoop/section-2/student-conduct-and-discipline.html>

DISABILITY ACCOMMODATIONS

UTEP is committed to provide an educational environment that is accessible to all students, those that need accommodations for a disability, please contact The Center for Accommodations and Support Services (CASS), located at Union Building East Room 106, or visiting its website <http://sa.utep.edu/cass/home> for an appointment to discuss your needs and the process for requesting accommodations.

Reasonable accommodations will be made unless it is determined that doing so would cause undue hardship on the University. Students requesting an accommodation based on a disability must register with the [UTEP Center for Accommodations and Support Services](#) (CASS). Contact the Center for Accommodations and Support Services at 915-747-5148, or email them at cass@utep.edu, or apply for accommodations online via the [CASS portal](#).

COVID-19 CONTINGENCY

In case of illness, please notify your instructor of record to make arrangements, so you can complete the missed lab work. Please attach the Covid-19 test documentation in the email you will send.

The instructions are in this link: [COVID manifesto.pdf](#)

SCHEDULE OF EXPERIMENTS

Week	Experiment
Jan 15-19	No Labs
Jan 22-26	Check-in, Welcome
Jan 29- Feb 2	Experiment 11 Polarity
Feb 5- 9	Experiment 12 Determination of Molar mass
Feb 12-16	Experiment 13 Spectrophotometry
Feb 19-23	Experiment 14 Reaction of Crystal violet: A kinetic study
Feb 26- March 1	Experiment 15 Determining Equilibrium constant
March 4-8	Experiment 16 Le Chatelier's Principal
March 11-15	No Labs in observance of Spring Break
March 18-22	Experiment 17 The solubility Product constant
March 25-29	No Labs in observance of Cesar Chavez Holiday
April 1-5	Experiment 18 Acid-Base Titration curves
April 8-12	Experiment 19 Electrochemical Cells
April 15-19	Experiment 20 Qualitative Analysis
April 22-26	Final Exam on Blackboard

DEADLINE FOR ASSIGNMENTS

Week	Experiment	Prelab	Lab Report	LABSTER SIMULATION
Jan 22-26	Check-in, Welcome	N/A	N/A	"Lab Safety" and "Chemistry Safety" Sunday Jan 28 at 11:59 PM
Jan 29- Feb 2	Experiment 11 Polarity	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Thin Layer Chromatography" Sunday Feb 4 at 11:59 PM
Feb 5- 9	Experiment 12 Determination of Molar mass	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Melting Point" Sunday Feb 11 at 11:59 PM
Feb 12-16	Experiment 13 Spectrophotometry	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Spectrophotometry: Beer-Lambert law" Sunday Feb 18 at 11:59 PM
Feb 19-23	Experiment 14 Reaction of Crystal violet: A kinetic study	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Reaction Kinetics: The essentials" Sunday Feb 25 at 11:59 PM
Feb 26- March 1	Experiment 15 Determining Equilibrium constant	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Equilibrium" Sunday March 3 at 11:59 PM
March 4-8	Experiment 16 Le Chatelier's Principal	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Chemistry safety: Hazardous symbols" Sunday March 10 at 11:59 PM
March 11-15	No labs- Spring Break	N/A	N/A	N/A
March 18-22	Experiment 17 The solubility Product constant	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Acids and Bases-Principles" Sunday March 24 at 11:59 PM
March 25-29	No labs- Cesar Chavez holiday	N/A	N/A	N/A
April 1-5	Experiment 18 Acid-Base Titration curves	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Advanced Acids and Bases" Sunday April 7 at 11:59 PM
April 8-12	Experiment 19 Electrochemical Cells	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Redox Reactions Simulation" Sunday April 14 at 11:59 PM
April 15-19	Experiment 20 Qualitative Analysis	The day before the experiment at 11:59 PM	At the end of the experiment before leaving the room.	"Introduction to Qualitative Analysis" Sunday April 21 at 11:59 PM
April 22-26	Final Exam	N/A	N/A	N/A
