Course Description

Basic Drawing I is a studio based course that introduces students to the foundations of drawing. This studio course emphasizes basic aesthetic and technical drawing skills that enable students to represent three dimensional objects in an environment. Topics to be covered include sketching and gesture exercises, perspective, proportions and scale, positive and negative space, and composition. Contour line and value are explored as compositional devices and tools to build volume, mass, and illusionistic space. Lectures will include examples relative to course work, while critiques will be held for comparative evaluation and critical feedback regarding in-progress and finished drawings.

The assignments in this course will include quick studies and developed, independent drawings. The majority of class time will be spent developing artwork based on sources such as still-lives, photographic references of architectural interiors and exteriors, landscapes, master studies, etc. Students are encouraged to keep a sketchbook as a tool for concept development.

This course requires additional time to be spent outside of class hours for completion of homework assignments and in-class work.

Course Objectives and Expected Learning Outcomes

- Develop expertise in working with a variety of black and white drawing media.
- Gain an understanding of composition and characteristics of line, shape, value and space.
