Course Description

Painting 1 is an introduction to the fundamental principles, techniques and aesthetics of oil painting. Students will be engaged in the technical practice of using painting tools, color mixing, preparation of various supports and surface qualities. The majority of work will be based almost entirely on direct observation.

The first part of this course will focus on specific assignments that help develop a foundation of skills needed to paint. By building on basic drawing and design concepts, students will investigate color-value connections, articulation of form, composition, and spatial relationships through the medium of water-based oil paint. Projects will include painting from still life setups while focusing on application and color mixing techniques. The second section is aimed towards development of visual vocabulary and expressive qualities. Students will be required to create paintings that focus on individual style while implementing learned techniques.

- Experience in handling oil paint, surface preparation, and application techniques.
