

**Discrete Mathematics**  
MATH 2300

**Syllabus**  
TR 12:00pm to 1:20pm

**Spring 2018**  
LART 303

**Instructor:** Julio César Urenda Castañeda

Office: Library 504

Hours: MTWR 11:25am - 11:55am or by appointment

email: [jcurenda@utep.edu](mailto:jcurenda@utep.edu)

phone: (915)747-7005

**Prerequisites:** Calculus I (MATH 1411). This is a mathematical maturity requirement, since we will not make use of calculus in this class.

**Course Objectives:** Upon successful completion of the course, you will know and be able to use the basic algebra of sets and of logic. You will be able to identify and use common classes of relations. You will know basic properties of arbitrary functions. You will be able to solve counting problems involving combinations and permutations, including counting problems with restrictions. You will know the basic definitions and theorems of graph theory, and be able to apply them to specific graphs. You will know the basic algorithms for traversing trees, and be able to apply them to specific trees. Note that this class will probably be quite different from other math classes you have taken, in at least two important ways. First, in contrast to calculus and related courses, the objects under consideration are (as the course title suggests) discrete, not continuous. This has the advantage that you can often explicitly list all the pieces (try listing all the function values of a continuous function!), but the disadvantage of not having continuity to tie things together nicely. Second, although there is still a lot of problem-solving, the problems and their answers have a very different flavor: the problems are not equations to be solved, and the answers often are not even numbers. We also may spend more time explaining why a particular solution works than in finding the solution. If time permits, we may discuss some ideas about automata theory, which enable us to have a formal definition of a computing device.

**Textbook: Discrete Mathematics, 5th ed., Dossey, et. al.**, Chapters. 2, 4, 5, 8, Appendix A and 10.4. We will skip some sections, as announced in class. The textbook is required at all class meetings.

*Required Reading:* Read each section that we cover in class, both before and after class. Skim the section before class, even if you do not understand it fully, to have some idea of what we'll be doing in class. Read it more carefully after class to clarify and fill in details you missed in class.

Warning: Sometimes, we will not cover all the material from a section in class, but instead focus on a particular aspect of the section. In such cases, I will point out in class which other parts of the section I expect you to read on your own.

## Grading

*Quizzes and Homework (20%)* Suggested homework problems will be assigned most class days and will generally be discussed at the next class. There will be approximately 12 quizzes, with problems taken from the homework. Quizzes are closed-book, closed-notes. Missed quizzes **cannot** be made up, but your two lowest quiz scores will be dropped. It is very important that you do your homework before it is discussed in class. You will only learn the material by doing it yourself, not by watching others do it for you. Mathematics is not an spectator's game.

*Midterm Exams (20%)* There will be three in-class exams, exact dates will be announced in class. Makeup exams can be given only in extraordinary and unavoidable circumstances, and with advance notice.

*Final (20%)* The final comprehensive exam will be on

Tuesday, May 8 <sup>th</sup> from 1:00pm to 3:45pm
--

## Policies

*Academic dishonesty:* It is UTEPs policy, and mine, for all suspected cases or acts of alleged scholastic dishonesty to be referred to the Office of Student Conduct and Conflict Resolution for investigation and appropriate disposition. See Section II.1.2.2 of the Handbook of Operating Procedures.

*Attendance:* I strongly encourage you to attend every class, though there is no particular grade penalty for absences. You are responsible to find out any assignment that must be made up if you are absent. My goal

is for class meetings and activities to complement, rather than echo, the textbook, and thus for every class to be worth attending.

*Drop date:* The deadline for student-initiated drops with a W is **Thursday, March 29<sup>th</sup>**. After this date, you can only drop with the Deans approval, which is granted only under extenuating circumstances. I hope everyone will complete the course successfully, but if you are having doubts about your progress, I will be happy to discuss your standing in the course to help you decide whether or not to drop. You are only allowed three enrollments in this course, and students enrolled after Fall 2007 are only allowed six withdrawals in their entire academic career, so please exercise the drop option judiciously.

*Courtesy:* We all have to show courtesy to each other, and the class as a whole, during class time. Please arrive to class on time (or let me know when you have to be late, and why); do not engage in side conversations when one person (me, or another student) is talking to the whole class; turn off your cell phone (or, for emergencies, at least set it to not ring out loud), and do not engage in phone, email, or text conversations during class.

*Disabilities:* If you have, or suspect you have, a disability and need an accommodation, you should contact the Center for Accommodations and Support Services (CASS) at 747-5148, [cass@utep.edu](mailto:cass@utep.edu), or Union East room 106. You are responsible for presenting to me any CASS accommodation letters and instructions.

*Exceptional circumstances:* If you anticipate the possibility of missing large portions of class time, due to exceptional circumstances such as military service and/or training, or childbirth, please let me know as soon as possible.
