Course Objectives: Students are expected to make considerable progress in the following areas:

#	Objective
1	Students will become familiar with the basics of general topology including topologies, continuity, separation and countability, compactness, metric spaces, and connectedness.
2	Students will be able to write clear and concise mathematical proofs using correct logical steps from hypothesis to conclusion
3	Students will be able to work with concrete examples such as the Cantor set.

Course Activities and Assessment:

Homework: Homework will be assigned each class day and discussed at the next class meeting. Students will be expected to give solutions at the board and will be assigned a grade for participation. Selected assignments also may be collected and graded.

Exams: There will be two mid-term in class exams as well as a final exam. The final exam will cover the entire course and will be held 1:00-3:45 Thursday December 14.

Course Grade: At the end of the semester, you will have percentage scores for your homework and for your mid-term and final exams. The homework and class participation will count 15%, each mid-term exam will count 25%, and the final exam will count 35% toward your course average. Grades will then be assigned according to:

A: 90-100% B: 80-89% C: 70-79% D:60-769% F: 0-59%.
