Course Information

Meeting day and time: MW, 1:30 pm – 2:50 pm
Room: Quinn Hall 203
Final Exam: Wednesday, May 8th, 4:00 pm – 6:45 pm
CRN: 26889

What is this course about? ECE 2302 is the continuation to ECE 2301. This course focuses on the behavior of inductors, resistors, and capacitors when sudden changes occur, such as placing or removing a source instantaneously. We will make use of the Laplace Transform, a mathematical tool that will allow us to obtain the behavior of circuits under different sources, and design circuits that filter different frequencies.

What can I expect? It is assumed that students in this class have some practice with circuits and circuit theory. ECE 2302 students are expected to take a very active role in their learning by completing readings and homework before class, coming to class ready to participate with peers and with the professor, and reviewing routinely for assignments and exams. In this course, we have evidence that every student can achieve if they are motivated to be an active learner!

Instructor Information

Jesus J. Gutierrez, Ph.D.
Assistant Professor of Instruction
Office: ENGR A-338
Office Hours: MW 3:00 pm – 5:00 pm
TR 2:00 pm – 4:00 pm
E-mail: jjgutierrez4@utep.edu

Course Materials

- Subscription to McGraw-Hill Connect Platform (see Blackboard)
- Textbook (Main):
  Fundamentals of Electric Circuits, 7th Edition
  Charles Alexander & Matthew Sadiku
  ISBN: 978-1-26-022640-9
- FREE PDF Textbook (Optional):
  Circuit Analysis and Design, Ulaby, Maharbiz, Furse
  Oxford University Press, 2018
  Link URL: https://cad.eecs.umich.edu/
What should you bring to class everyday:
- Pen/pencil and paper/notebook for taking notes.
- TI-85 or TI_89 scientific calculator or equivalent (NO TI-INSPIRE or equivalent)
- Laptop with access to the internet.
- Access to Multisim and/or LTSpice.

Course content will be delivered through Blackboard. Also, important class announcements will be delivered via Blackboard and/or e-mail. Please make sure your UTEP e-mail is working, and you have stable access to the internet.

LTSpice is a free, open-source SPICE simulator software developed by Analog Devices, Inc. that includes a graphical schematic capture interface. To download and install LTSpice, visit: https://www.analog.com/en/design-center/design-tools-and-calculators/ltspice-simulator.html

If a student has no computer with access to the internet, from UTEP’s Technology Support Center has borrowing services for laptops and tablets: https://www.utep.edu/technologysupport/TSCenter/TSC_EQ_LaptopsTablets.html

UTEP’s Technology Support center also helps for technological needs beyond your scope of troubleshooting, so make sure you contact them if you encounter technical difficulties.

Corequisites
- ECE 2102 – Lab for ECE 2302

Prerequisites
By Course (with grade of “C” or better):
- ECE 2301 – Circuits I
- PHYS 2421
- MATH 2326 – Differential Equations

Course Outline
Topics covered in this course include:

1. Analysis of first order and second order circuits in the time domain.
2. Laplace Transform and circuit analysis using Laplace Transform.
3. Frequency response of circuits, passive first-order and second-order circuits.
4. Design and analysis of active filters in the frequency-domain, Bode plots.

Relationship to (ABET) Program Outcomes
- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics:
  Students use mathematical and engineering concepts in the analysis and design of complex electrical circuits.
How can I succeed in the course?
This course may be difficult to you, especially if you received A’s and B’s in previous courses for memorizing course material. However, this course is not about memorizing equations or theory. It’s about applying equations and deriving them. You may be wondering: how do I achieve this? The answer in my experience is… practice, practice, practice!
If you practice enough, you will be able to recognize patterns and become familiarized with the process needed to derive equations, which will give you a deeper understanding about circuits and their usefulness and presence in our everyday lives.

Rules and Policies

How is your grade determined?
Student achievement in the course objectives will be assessed using a combination of in-class work, homework, participation, and exams. Student grades are protected by the Privacy Act of 1974.

Your course grade will be determined by your weighted performance in the following categories:

1. Reading Assignments ............ 8% 90% – 100% → A
2. Homework.......................... 12% 80% – 89% → B
3. Weekly In-class Assignments..... 10% 70% – 79% → C
4. Midterm Exams (3)................ 54% 60% – 69% → D
5. Final Exam ........................ 16% 0% – 59% → F

How can I succeed in the course? This course may be difficult to you, especially if you received A’s and B’s in previous courses for memorizing course material. However, this course is not about memorizing equations or theory. It’s about applying equations and deriving them. You may be wondering: how do I achieve this? The answer in my experience is… practice, practice, practice!
If you practice enough, you will be able to recognize patterns and become familiarized with the process needed to derive equations, which will give you a deeper understanding about circuits and their usefulness and presence in our everyday lives.

Not all students do as well as they think they will when they walk into class on the first day. Why is this? My experience tells me that:
1) Some students do not have the active learning and studying skills that they should already have at college level (it takes one or two exams to recognize this). We can fix this together.
2) Some students do now actually put the effort that is necessary (even though they think they are putting in a big effort). You can fix this if you are honest with yourself.

For some students, there may be a “gray area” between two-letter grades in the final distribution, so two people getting the same weighted average grade could get different letter grades. If you are in one of these gray areas, whether you get a higher or lower grade depends on two factors: (a) class participation and (b) whether your performance has been improving or declining over time.

What are Reading Assignments?
It is essential that you take time outside of class to do your reading assignments so that you come prepared for class. Taking notes while doing your reading assignment will help you not only to perform better in the course, but also to retain more information, and develop a deeper understanding and appreciation for electrical engineering.
The reading assignment will be done through McGraw-Hill Connect and it is 10% of your grade. The assignment consists of reading a section of the e-book and answering concept questions.
How can you prepare for exams? The best way to ensure that you will succeed is showing up to class, taking notes, doing all homework, and reading assignments with plenty of time to make mistakes and ask questions. Also, do not forget the importance of sleep before an exam!

What are the Rules for the Homework?
Homework will be done on McGraw-Hill Connect, with the due date marked on the assignment. Any submissions later than this time-frame window will be marked as late, and the score will drop by 30% for each day late. See my course goals below and realize that I am trying to help you succeed in your academic and professional career by giving you these assignments.

What are In-Class Assignments?
On each Wednesday class, with some exceptions, there will be an assignment covering the material from previous course material. The weekly assignments will account for 10% of the final grade. The time allotted for the assignment will be no more than 15 minutes. The assignments may be done individually or in groups. The two lowest graded in-class assignments will be dropped.

What are the rules for the exams?
- You will only have a calculator, pen or pencil, eraser, and one cheat sheet with formulas or problems with your name and UTEP ID on both sides of the paper.
- Full work must be shown for full credit. Work must be neat and well organized. The final answer must be boxed and given proper units.
- If you get 90% or better grade for the midterms, you are exempt from the final exam.
- The tentative schedule for the exams is shown in the chart below, subject to change:

~ Missed Exams ~
A missed exam can be made-up IF AND ONLY IF:

(1) you have a non-frivolous reason that is beyond the student’s control: medical excuse, jury duty, death in the family or automobile accident, job interview, conference, or out-of-town job-related travel, and

(2) prior consent is obtained from the professor for missing the exam, and

(3) show up to the rescheduled exam on the date and time provided.

In either case, the student must submit a written and signed statement before the scheduled exam, describing the reasons for missing, appropriate documentation, and petition for a make-up exam. Then the instructor will re-schedule the exam and the student will show up at the date and time provided. A missed exam will carry zero grade if these conditions are not met.

How do I Participate in the Course?
As an active learner, you will appreciate the value of discussions and participation in in-class assignments. Participating in class does not necessarily mean talking a lot or asking a lot of questions. Some of the most helpful things you can do to enrich participation is doing class work, helping fellow classmates by explaining during group exercises, and answer questions asked by the professor in a thoughtful manner.
What will I achieve after taking this course? Course Goals

- **This course should prepare you to succeed in future Electrical Engineering courses.** You will learn how to be an active learner in the lecture hall and how to actively study. Research has shown that students who do readings/assignments before class, actively participate in class, and review notes regularly can and will succeed in this and future courses. This course is designed to equalize your readiness for class, and your effort will pay off as you practice connecting the topics together and gaining confidence in your ability!

- **This course will help you in learning how to learn.** How do you know you are learning? When you make mistakes, you identify what you don’t know. Making mistakes is key to learning. Recognizing gaps and asking questions is key to learning. It is best to make mistakes in homework and assignments when the stakes are low, so you are successful on the exam.

- **This course will provide you with the basic concepts and skills that make up the field of electric circuits.** At the end of the semester, you will:
  - Calculate the transient behavior of RL/RC and RLC circuits.
  - Determine transient and steady-state behavior of circuits using Laplace Transform.
  - Design passive filters with frequency behaviors based on different applications.
  - Design active filters with frequency behavior based on different applications.
  - Characterize the frequency behavior of passive and active filters using Bode Plots.

- **This course should excite you about circuits and electrical engineering in general.** Throughout the semester I hope you ask yourself and me, why is this relevant to me? Some lessons will be more obvious as they relate to everyday devices and applications. I hope that the content we learn in this semester will cause you to ask more questions, and even leave you with more questions than answers! If I get you to read some circuits and electrical engineering material other than the book on your own, share it with me! I will be a happy professor.

Academic Dishonesty

As an entity of The University of Texas at El Paso, the Department of Electrical and Computer Engineering is committed to the development of its students and to the promotion of personal integrity and self-responsibility. The assumption that a student’s work is a fair representation of the student’s ability to perform is the basis for departmental and institutional quality. All students within the Department are expected to observe appropriate standards of conduct.

Any student who commits an act of scholastic dishonesty is subject to discipline. Scholastic dishonesty includes but is not limited to cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any
act designed to give unfair advantage to a student or the attempt to commit such acts.

Any case involving academic dishonesty will be referred to the Office of the Dean of Students. The Dean will assign a Student Judicial Affairs Coordinator who will investigate the charge and alert the student as to its disposition. Consequences of academic dishonesty may be as severe as dismissal from the University. See the Office of the Dean of Students’ homepage (Office of Student Life) at http://studentaffairs.utep.edu/dos for more information.

You can also refer to the IEEE website for information on our code of ethics: http://www.ieee.org/about/corporate/governance/p7-8.html

**American Disabilities Act**

The University is committed to providing services, equipment, and accommodations to individuals with documented disabilities to provide them with equal opportunities to participate in programs, services, and activities in compliance with Sections 503 and 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act (ADA) of 1990, and the Americans with Disabilities Act Amendments Act (ADAAA) of 2008. If you have a disability and need classroom accommodations, please contact The Center for Accommodations and Support Services (CASS) at 747-5148, or by email to cass@utep.edu, or visit their office located in UTEP Union East, Room 106. For additional information, please visit the CASS website at www.sa.utep.edu/cass.

**Discrimination Statement**

I do not discriminate, nor will I allow discrimination, on the basis of race, color, national origin, sex, religion, age, disability, genetic information, veteran’s status, sexual orientation, or gender identity. Members of the UTEP community are protected from discrimination and harassment by the State and Federal Laws.

**University Resources**

**Technology Resources**

- **UTEP Technology Support**: Students experiencing technological issues or challenges (e-mail, Blackboard, software, etc.) can submit a ticket to the UTEP Helpdesk for assistance. www.utep.edu/technologysupport

- **UTEP Engineering Technology Center (ETC)**: Provides laptop and computer repair services for engineering students, as well as service requests for software. www.utep.edu/engineering/etc/

**Academic Resources**

- **UTEP Library**: Access to a wide range of resources including online, full-text access to thousands of journals and e-Books, plus reference services and librarian assistance for enrolled students. www.utep.edu/library/
• **Math Resource Center for Students (MaRCS):** Ask a tutor for help (including remotely) and explore available math resources like formula sheets, tables, and videos. [www.utep.edu/science/math/marcs](http://www.utep.edu/science/math/marcs)

• **Advancement Center for Engineering Students (ACES):** Students serving other students. Hybrid tutors provide tutoring for a wide range of topics including engineering, math and science, and also manages room reservations. [www.utep.edu/engineering/student-resources/student-resources-aces.html](http://www.utep.edu/engineering/student-resources/student-resources-aces.html)

**Individual/Well-Being Services**

• **YWCA Early Learning Academy:** Conveniently located on campus to serve the, YWCA’s Early Learning Academy is the best childcare solution for UTEP students, faculty, and staff. [https://www.utep.edu/student-affairs/early-learning-academy/](https://www.utep.edu/student-affairs/early-learning-academy/)

• **Military Student Success Center:** Assists personnel in any branch of service to reach their educational goals. [www.utep.edu/student-affairs/mssc/](http://www.utep.edu/student-affairs/mssc/)

• **Center for Accommodations and Support Services (CASS):** Assists students with ADA-related accommodations, for coursework, housing, and internships. [www.utep.edu/student-affairs/cass](http://www.utep.edu/student-affairs/cass)

• **Counseling and Psychological Services:** Provides a variety of counseling services including individual, couples, and group sessions, as well as career and disability assessments. [www.utep.edu/student-affairs/counsel](http://www.utep.edu/student-affairs/counsel)
