Environmental Science internship
ESCI 4398/CRN: 14346

Instructors
Dr. Vanessa Lougheed (she/her): vlougheed@utep.edu
Dr. Lixin Jin (she/her): ljin2@utep.edu

Grading
Since you are registered for ESCI 4398 (internship) this semester, you should have already had an internship experience. During this semester, you will be expected to do the TWO things listed below to get credits for your internship and receive a final grade. (You will receive an automatic “C” in the course until these requirements are completed, at which point your grade will be adjusted accordingly).

1. Oral presentation:
   Near the beginning of the semester, we will reach out to you to schedule your presentation. Your presentation should be in a Powerpoint slide format and should be 10-12 minutes long. Your presentation should summarize:
   • Where you worked
   • How you found out about your internship
   • What skills you learned
   • How did this experience relate to and/or modify your career goals
   • What to look for in an internship (topic & mentor)
   • Recommendations for others on how to find an internship
   • What you would have done differently if you did it again
   You will be graded both on the content of the presentation, your ability to answer questions from the audience, as well as your presentation skills (i.e. visual appeal of slides (photos, diagrams, >18pt font, fewest words possible); Can you explain your slides, graphs etc without reading?).

2. One slide summary
   Please upload your summary slide here by Dec 1. A power point slide converted to jpg format is the preferred file format (easier to use on a variety of platforms). Thanks!
   You should include a photo of yourself, as well as (in a legible font):
   1. Your name
   2. Project topic
   3. Location
   4. Dates
   5. Who to contact for more info about this

Here is one example:
