### **Course Description**

The course will focus on the study and performance of solo repertoire of different style periods and technical exercises such as scales, arpeggios and etudes. The meetings will be 50 minutes in length, once a week.

### **Course Goal**

Achieve the highest level of performance of the selected repertoire and technical studies assigned for the semester. Through commitment to the instrument, discipline, daily practice, and hard work, develop adequate practicing habits to improve week after week and complete the assigned repertoire.

### **Objectives**

- To master all major and minor scales and arpeggios and selected technical exercises according to the needs of each student and level.
- To improve technical skills, finger dexterity, coordination, memorization techniques, and musicality through the study and performance of assigned repertoire. Every week the student should demonstrate that he/she has incorporated many of the musical and technique aspects worked and discussed in class.
- To incorporate all elements of music (theory, history, performance practice, and analysis) into the study of repertoire and sight-reading.
- To improve sight reading skills by practicing sight-reading daily (a minimum of 5 pages, every day, every week, all semester long!).
- To think critically and constantly reflect on performance goals, constructive criticism in lessons, and achievements.
- To develop the sense of curiosity to acquire knowledge of composers' lives and works to gain insight on the repertoire and composers studied during the semester.
- To perform publicly in different settings to gain experience as a performer.
