

**The University of Texas at El Paso  
College of Health Sciences  
Clinical Laboratory Science Program**

**CLSC 4275: Clinical Laboratory Management & Supervision  
Syllabus Addendum  
Spring 2021**

This course will be offered, as a “self-study”, adult learning: andragogy course. Andragogy makes the following assumptions about the design of learning:

1. Adults need to know why they need to learn something.
2. Adults need to learn experientially.
3. Adults approach learning as problem-solving.
4. Adults learn best when the topic is of immediate value.

Therefore, in order for you to be ready, it is important that you read and prepare. Your primary knowledge and understanding of reading will be essential for success with course activities/assignments. These assignments will be completed and submitted as a group/team. (I believe that the discussion of material will be best understood when 2-3 people work together – like a study group).

Teams:

1. Will be either chosen by the instructor or you will make your own team (2-3 students per team).
  - a. Send email of your preference by Friday, January 22, 2021 (as your first assignment is due Friday, January 29, 2021), so that I can assign the teams.
2. You can meet via Zoom to discuss the material and complete the assignments.
