Lab Manual: Laboratory Manual for GEOL 1312, available at
<http://studylib.net/doc/18515691/laboratory-manual---utep----geological-sciences>

Course Description: Laboratory to accompany GEOL 1212, Earth Sciences 2, which is 1) the survey of earth history as interpreted from and exhibited by plants, animals, rocks, and minerals, 2) the study of the earth in space, and 3) the survey of the physical processes operating in the hydrosphere, including concepts of historical geology, astronomy, physiography, and oceanography. Concurrent lab/lecture enrollment required. **Prerequisites:** Geology 1111.

Class objectives: Upon successful completion of this course, you will be able to: 1) identify sedimentary rocks and fossils; 2) describe geologic field relationships; 3) describe how different planets in the solar system compare to each other; 4) describe components of groundwater systems; 5) compute rates of radioactive decay.

Attendance: In order to pass this course, you must attend the lab meetings. If you miss more than two labs and do not make them up within one week of the absences, you may fail the class or be dropped by the instructor. If you miss a lab, it is your responsibility to learn the material, since it will be on the quiz the following week, and the final exam.

Grading: The grade for this laboratory will be independent from the lecture portion. The lab portion of your grade will be determined as follows. Each of the eleven lab sessions is worth 10 points; the lowest grade will be dropped for a maximum total of 100 points. Each of the six quizzes are worth 10 points each, the lowest grade will be dropped for a maximum total of 50 points. The Final Exam is worth 50 points.

11 Labs at 10 points each (drop lowest) = 100
6 Quizzes at 10 points each (drop lowest) = 50
Final Exam = 50
Total = 200 points

Students with Disabilities: If you have a disability and need classroom accommodations, please contact The Center for Accommodations and Support Services (CASS) at 747-5148, or by email to cass@utep.edu, or visit their office located in UTEP Union East, Room 106. For additional information, please visit the CASS website at www.sa.utep.edu/cass. See also <http://ddce.utexas.edu/disability/>.

Grade of Incomplete: All grades of Incomplete must be accompanied by an Incomplete Contract that has been signed by the instructor of record, student, departmental chair, and the dean. Although UTEP will allow a maximum of one year to complete this contract, the College of Science requests it be limited to one month based upon completion data. A grade of Incomplete is only used in extraordinary circumstances confined to a limited event such as a missed exam, project, or lab. If the student has missed a significant amount of work (e.g. multiple assignments or tasks),

a grade of Incomplete is not appropriate or warranted.

Academic Honesty and other issues: The Geological Sciences Department has gone to great lengths in order to make learning the material easier than engaging in scholastic dishonesty, which is defined in the UTEP Student Handbook and also at <http://www.utep.edu/dos>. Proven violations of these detailed regulations may result in any of the consequences outlined in the Student Handbook. Cellular phones and pagers are to be turned off or placed in silent mode during class. Conducting telephone conversations during class time may result in disciplinary action.

Course Outline Note: This outline is subject to change.

Week 1	Jan. 18	No Class
Week 2	Jan. 25	Exercise — Review of Minerals
Week 3	Feb. 1	Exercise — Igneous Rocks and Plate Tectonics
Week 4	Feb. 8	Quiz: <i>Minerals and Igneous Rocks</i> Exercise — Fossils
Week 5	Feb. 15	Quiz: <i>Fossils</i> Exercise — Sedimentology, Microscopy
Week 6	Feb. 22	Exercise — Sedimentary Rocks
Week 7	Mar. 1	Quiz: <i>Sedimentology and Sedimentary Rocks</i> Exercise — Stratigraphy
Week 8	Mar. 8	Exercise — Interpreting Geologic History
Week 9	Mar. 15	Spring Break – No class
Week 10	Mar. 22	Quiz: <i>Stratigraphy & Interpreting Geologic History</i> Exercise — Relative Dating and Absolute Dating
Week 11	Mar. 29	Quiz: <i>Relative Dating and Absolute Dating</i> Exercise — Surface Water and Groundwater
Week 12	Apr. 5	Exercise — Introduction to Geophysics
Week 13	Apr. 12	Quiz: <i>Surface Water and Groundwater & Geophysics</i> Exercise — Impact Craters and Exploring the Solar System
Week 14	Apr. 19	<i>Review for Final Exam</i>
Week 15	Apr. 26	<i>LAB FINAL EXAM</i>
Week 16	May 3	Return and review final exam
