The University of Texas at El Paso
College of Health Sciences
Doctor of Physical Therapy Program

PT 6116 Physical Therapy Capstone Project Fall 2017

Credit Hours: 1
Contact Hours: 15

COURSE SYLLABUS

Schedule: Independent Study
Private Oral Defenses with Faculty December 11, 2017 from 9am-noon
Public Poster Presentations December 14, 2017 from 4-7 pm

Capstone Instructors: Rhonda Manning, PT, DPT, PCS
Mark Caulkins, MD, DPT
Loretta Dillon, PT, DPT
Michelle Gutierrez, PT, DSc
Celia Pechak, PT, PhD, MPH
Bryan Boyea, PT, DPT, OCS
Kevin Browne, PT, ScD, OCS

Course Description:
During the final semester of the Doctor of Physical Therapy Program, students will complete an evidence-based research manuscript and poster presentation relevant to physical therapy practice. Most students will complete an evidence-based report related to a patient case. Selected students, at the invitation of a core faculty member, will participate in the faculty member’s original research line. All students must produce a manuscript suitable for publication in a peer-reviewed journal and a poster appropriate for presentation at a state or national conference.

Course Objectives:
Prior to this semester, the student will have:
1. Developed a research question
2. Designed an appropriate study to answer the research question (for most students, this will be systematic review to answer a PICO question)
3. Completed a study to answer the research question

During this course, the student will:
1. Produce a manuscript consistent with the requirements of Physical Therapy (7D9,7D11)
2. Produce a poster that summarizes his/her research project and is appropriate for presentation at a state or national conference (7D9,7D11)
3. Demonstrate knowledge of research design and validity through a professional quality presentation and an oral defense of his/her research project (7D9,7D11)
Resources:
Resources related to Systematic Reviews:
- http://www.medicine.ox.ac.uk/bandolier/painres/download/whatis/Syst-review.pdf
- http://research.library.gsu.edu/c.php?g=115802&p=752506

Library Guide for Poster Design: http://libguides.utep.edu/posters

Recommended Texts:

Methods of Instruction:
Individual instruction will be held with respective capstone advisor to complete the manuscript and poster presentation requirements.

Methods of Evaluation:
Graded activities and their weight are as follows:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Research Manuscript</td>
<td>40%</td>
</tr>
<tr>
<td>Poster</td>
<td>20%</td>
</tr>
<tr>
<td>Poster Presentation</td>
<td>20%</td>
</tr>
<tr>
<td>Oral Defense (individual grade)</td>
<td>10%</td>
</tr>
<tr>
<td>Reflection Paper (individual grade)</td>
<td>10%</td>
</tr>
</tbody>
</table>

UTEPA DOCTOR OF PHYSICAL THERAPY PROGRAM GRADING SCALE

The following letter grade scale is used for the UTEP Doctor of Physical Therapy Program:

<table>
<thead>
<tr>
<th>Letter Grade Scale</th>
<th>Numerical Grade Scale</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>90-100</td>
</tr>
<tr>
<td>B</td>
<td>80-89</td>
</tr>
<tr>
<td>C</td>
<td>75-79</td>
</tr>
<tr>
<td>F</td>
<td>Below 75</td>
</tr>
</tbody>
</table>

Course Content: Research project (systematic review or other project)
Special Accommodations (ADA):
“If you have or suspect a disability and need accommodations, you should contact the Center for Accommodations and Support Services (CASS) at 747-5148.” You can also e-mail the office at cass@utep.edu or go by their office in Union Building East. For additional information, visit the CASS website at http://sa.utep.edu/cass/

Deadlines for Capstone Project:
- Meet with Capstone advisor on **Wednesday Aug 30**: Every article should have been appraised by each member of the group using standardized appraisal tool, and group consensus should have been reached prior to this date. See instructions on page 6 of this syllabus for more information as to what you will need to present.
- Full 1st draft of manuscript (with all sections completed per PTJ author instructions, including abstract) is due to your Capstone advisor on **Friday Sept 15**
  - Each advisor has the option to set earlier deadlines for portions of the manuscript
  - Faculty are required to send you their input within 2 weeks
- FINAL manuscript is due to your Capstone advisor on **Friday Oct 20** – this is the paper that will be graded.
- Full 1st draft of the Poster is due to your Capstone advisor on **Friday Nov 3**
  - Faculty are required to send you their input within 1 week
- FINAL draft of the Poster (formatted for 48” width x 36” height) is due to your Capstone advisor & to John in ILC jpena13@utep.edu on **Monday Nov 27**
  - John will print out a ½-size hard copy of poster that week (paid for by DPT Program) that advisors and students will look at next week
- You will meet with your advisor on **Monday Dec 4** to complete final edits on the hard copy of the poster – communicate directly with your advisor regarding time and location
- You must submit FINAL-FINAL poster for printing no later than **Wednesday Dec 6** (paid for by DPT Program) – more details to follow about if we will use library vs ILC for this
- Reflection paper is due **Wednesday Dec 6** to your Capstone advisor
- **DEFENSE of your research project will be scheduled on Monday December 11** with 2 faculty members; you will EACH be required to answer questions regarding your project and general research knowledge & you receive an individual grade – more information to follow
- Public poster presentation – **Thursday December 14**
  - Communicate directly with your Capstone advisor regarding a possible additional practice session prior to your public poster presentation

Oral Defense Date:
Private Oral Defenses with Faculty will be on **Monday December 11** at the Campbell Building Schedule & room number to be announced

Public Poster Presentation Date:
**Thursday December 14** from 5-7pm (poster must be mounted in Health Sciences and Nursing (HSN) Building lobby by 4:50pm)
Reflection Paper: (10% of final grade)

- Reflection paper is due **Wednesday December 6**.
- Each student will submit a 1 ½ to 2 page doubled-spaced paper electronically to his/her advisor answering the following in the body of the paper.
  1. What did the Capstone project teach you with respect to evidence-based practice?
  2. How did this project enhance your clinical reasoning skills?
  3. How will you become a better DPT based on what you learned from this Capstone project?
  4. How could this Capstone project be improved for future cohorts?
- Each paper should have 6 paragraphs: an introductory paragraph, one paragraph answering each of the following, and a concluding paragraph.

Systematic Review Instructions:
The systematic review will be completed by a team of 3-4 students. All students will be active in the extraction and appraisal of articles found to answer a clinical question. The team must construct a clear, concise, and answerable question that is based on a specific patient problem students encountered during the curriculum.

- EVERY student should be involved in EVERY portion of the work – including:
  - EVERY student should have been involved in searching all databases. If this is not how you did it, you should be clear in your Methods section who did what: “Two investigators (CP, LD) searched the following databases...”
  - EVERY student should APPRAISE every article. You should not be splitting the articles among the group. Every student should appraise all 10 articles (or more if you have more than 10).
  - While you may of course choose to split up sections of the manuscript, particularly initially, EVERY student should still be involved in editing every portion of the paper.

- Your Methods section should clearly explain how your search was completed – including all words used in the search. The point is that you give enough information that it is reproducible. Create a table like below as an APPENDIX in your paper. You can find more information about it at: http://www.cebm.net/finding-the-evidence-1-using-pico-to-formulate-a-search-question/

<table>
<thead>
<tr>
<th>P</th>
<th>I</th>
<th>C</th>

<td>balance</td>
</tr>
<tr>
<td></td>
<td>Strength training</td>
<td></td>
<td>Fall risk</td>
</tr>
</tbody>
</table>

- Of the 10 articles that you formally appraise, a MINIMUM of the top six (6) should be synthesized in your systematic review.
  - You must include the appraisal table(s) of all them in your paper as a table(s) OR as an appendix(es)
- Each group can choose whatever standardized appraisal tool(s) to use as appropriate – you must justify why you chose them (eg, used in other published systematic reviews in PTJ) and you discuss validity/reliability issues in your paper (with references)
Here is a good link with lots of options depending on the type of study: http://www.unisa.edu.au/Research/Sansom-Institute-for-Health-Research/Research/Allied-Health-Evidence/Resources/CAT/

The CEBM worksheets are found at: http://www.cebm.net/critical-appraisal/

Other resources can be found at: http://www.casp-uk.net/#!checklists/cb36

If in doubt, get pre-approval from your advisor

Each group will present to his/her advisor on **Wednesday August 30** (as part of your grade for Specific Populations PT 5225). You should be prepared to provide a 15-20 minute PowerPoint presentation addressing the following:

- PICO question
- Briefly review Methods
- Briefly review Appraisal table(s) for ALL articles
- Then explain the single BEST article in depth that addresses your PICO question

Then your advisor will further probe your knowledge with questions related to your methods, the articles, and research methods in general – to help prepare you for the REAL Capstone defense in December

The team must work cohesively by setting structured objectives to complete the final product. The goal of which is for all members to contribute equally to the completion of a systematic review suitable for publication. Through using effective communication and constructive conflict resolution as necessary, the faculty expects that the team will meet all objectives in a professional manner. However, in the event a conflict cannot be resolved, the team has the power to dismiss a team member. The consequences of being dismissed from a team will delay graduation, at a minimum of one semester, for the dismissed team member. The individual will have to complete an independent project and present an oral defense in the spring semester to the satisfaction of all faculty.

All students who complete a systematic review must follow the relevant *Physical Therapy* (PTJ) guidelines to authors found at: https://academic.oup.com/ptj/pages/Author_Guidelines

Read and follow all details of the instructions on the PTJ Website. The exception is that only an unmasked manuscript will be submitted to the faculty advisor; a “masked version” (or blinded version – ie, where your name and institution would not be included) does not have to be submitted. Also students do not need to submit “online-only” materials nor video for this assignment.

1. Read the review process in detail as well as the PRISMA checklist and flow diagram.
2. PRISMA requirements are found at: http://www.prisma-statement.org/ (Key documents are found at this site).
3. The manuscript formatting instructions must be followed:
   a. Title-follow character limits (this title will be used in the doctoral reception documents and on your graduation application)
   b. Abstract –follow word limits and use of required subheadings
c. Body of manuscript—follow all instructions for word count, subheadings as stated, and for all sections as listed below:
   i. Introduction
   ii. Methods (with required subheadings per PTJ Website)
   iii. Results
   iv. Discussion
d. Acknowledgments
e. References
f. Tables
g. Figures
h. Appendixes

The title page of the manuscript should have the following included:
- Title
- University of Texas at El Paso
- Author(s)
- Faculty Advisor
- Clinical capstone project submitted in partial satisfaction of the requirements for the Doctor of Physical Therapy Degree.

A signature page is also required that meets the UTEP Graduate School’s expectations.

**Independent Research Project Instructions:** Students who are completing an independent research project should be communicating closely with his/her faculty advisor regarding expectations.

**Manuscript Submission:** The team will submit one Word-processed double-spaced manuscript along with any files of journal articles which are referenced to his/her advisor.

In addition, the final document along with the signature page must be scanned and emailed to Beverly Scarborough at bscarborough@utep.edu along with the PowerPoint of the poster presentation by the deadlines described above.

**Manuscript Rubric:** The rubric for students who complete a systematic review is below. Students who complete an independent research project will have similar expectations. However, the manuscript sections and content will vary depending on the type of study and manuscript (eg, quantitative versus qualitative); therefore his/her rubric will likely vary somewhat. Students who complete an independent research project should communicate closely with their Capstone advisors to be aware of expectations.

**COMMENTS:**

TOTAL = ________ / 30 points = ________%
General expectations: Each student is expected to participate fully in the public presentation of his/her group’s poster, and demonstrate professional dress and behavior as if presenting at a state or national conference. If a student meets these expectations, s/he will earn 20 of 20 points. Failure to meet these expectations will result in deductions per below:

- 20 points if student does not attend public poster presentation
- 20 points if student does not consistently present his/her fair share of the poster (eg, each student in a group of 4 should present ~25% of the poster)
- 5 points for unprofessional dress
- 5 points for unprofessional behavior (eg, negative body language, repeatedly interrupting colleagues, chewing gum, etc)
- 1 point for each minute late

TOTAL = ________ / 20 points
