

**“The mediocre teacher tells. The good teacher explains. The superior teacher demonstrates.  
The great teacher inspires.” -- William Arthur Ward, writer**

SCED 4367/4368 (21035/23358)  
**ONLINE HYBRID**  
**SYNCHRONOUS/ASYNCHRONOUS**  
Teaching Mathematics & Science in Secondary School  
Spring 2023

This syllabus is subject to change as needed. Any changes to the syllabus will be announced via email or posted on Blackboard. Please note this course is an Online Course.

Instructor Contact Information: Ruby Lynch-Arroyo, PhD

Contact/E-mail: [rllynch@utep.edu](mailto:rllynch@utep.edu)

Synchronous Virtual on Blackboard Zoom Class Meeting Times: Thursdays 5:30 pm – 8:20 pm

Office Hours: Virtual on Blackboard Zoom Thursdays after class meeting; By Appointment

### **Course Philosophy and Description:**

For teachers of mathematics and science to be truly effective involves bringing together four basic components:

- A. An appreciation of the discipline of mathematics and/or science itself.
- B. An understanding of how students learn and construct ideas.
- C. An ability to design and select challenging tasks, create problem-solving environments.
- D. The ability to integrate appropriate, mathematically, and/or scientifically meaningful assessment within the teaching process.

One of the main components of teaching is helping students to “discover” mathematics or science for themselves by creating successful inquiry-based, active learning environments, a friendly atmosphere, and an “open mind” approach. The goal of teaching is not only for students to find the correct answer, but to find answers using the "best" method. Hence, a teacher needs to promote students' thinking, to encourage searching for different methods leading to the same answer. Discovery learning is enhanced with error analysis and trial and error. The role of the teacher is to integrate novelty to engage students by posing challenging problems and encourage students to invent new ways of approaching the problem without fear of making a mistake.

This course has been constructed to help you in critically examining the philosophies, theories, research, pedagogical techniques, and materials associated with effective learning and teaching in

secondary classrooms.

### **Course Goals and Objectives:**

We will address factors that support meaningful growth and progress on an inner journey towards personal transformation. Our classroom community will develop a process that will allow us to explore “who we are, what assumptions we hold as true, how and what we teach, how we organize ourselves, and what barriers prevent us from creating authentic learning environments” (Crowell, Caine & Caine, 1998).

Students enrolled in this course will explore the methods of teaching in secondary classrooms. Emphasis is placed on the equity principle (learning for all) and development of conceptual understanding of topics, as well as project/problem-based learning. Specifically, students will become more effective in the following areas by:

- Exploring innovative learning theories and techniques of teaching and learning including problem-based and inquiry, open-ended approach.
- Studying how to apply general and content methods of teaching and learning in diverse classroom settings.
- Helping the students to create successful learning environment in teaching and learning.
- Writing and analyzing lesson plans that support the learning cycle.
- Unpacking state standards for specific content areas and developing practical and engaging use of state standards/TEKS, NCTM Standards, Next Generation Science Standards (NGSS), and Common Core State Standards (CCSS)
- Demonstrating use of educational technology within lesson plan development and mini-teaching experiences.
- Demonstrating understanding of critical reading of texts and web sites through writing and discussion.
- Demonstrating reflection about teaching and learning through writing and discussion.
- Writing and discussion to demonstrate an informed perspective about curriculum and related educational issues.
- Addressing the domain and competencies that will prepare you for state certification content exam [TeXes].

### **Course Structure:**

Classes for this course are Synchronous and asynchronous online (UTEP Blackboard). Asynchronous classes may be a combination of PowerPoint/Video lecture, Blackboard discussion boards, individual/group course assignments, assessments, and exercises, and final exam/project development. It is expected that students will participate in all activities and components of the course.

**SCED 4367 Required Texts:**

Your Own Electronic Device, textbooks (hardback/e-book) and designated online materials/sites. PLEASE LET ME KNOW ASAP IF YOU HAVE ISSUES WITH ACCESS TO AN ELECTRONIC DEVICE. PLEASE CHECK UTEP FOR COMPUTER LAB ACCESSIBILITY.

Student Learning Outcomes

*“Talent is a dreadfully cheap commodity, cheaper than table salt. What separates the talented individual from the successful one is a lot of hard work and study.” ~Stephen King.*

The course’s learning outcomes will require the student to acquire throughout the semester knowledge and skills and build upon them. The following table provides a list of the most relevant student learning outcomes for the course. The following outcomes are aligned with SBEC-approved Texas educator standards. Please, see the full standard\* at [http://tea.texas.gov/Texas\\_Educators/Preparation\\_and\\_Continuing\\_Education/Approved\\_Educator\\_Standards/](http://tea.texas.gov/Texas_Educators/Preparation_and_Continuing_Education/Approved_Educator_Standards/)

Table 1. Student learning outcomes and assessment Student

Learning Outcomes		Formative & Summative Assessments
<i>TeXes</i> 7-12	<i>By the end of the course, the student will be able to:</i>	<i>To evaluate these outcomes, the faculty member will use the following assessment procedures:</i>
V, VI	Develop an understanding of current issues, practices and directions in mathematics and science curriculum and the ability to inquire into these.	a. Class and online interactive, Socratic discussions b. Quizzes and Exams c. Written Reflections
V, VI	Develop knowledge and skills in educational research	a. Class and online interactive, Socratic discussions b. Lesson Plan Development c. Quizzes and Exams c. Written Reflections
V, VI	Identify and Analyze topics of importance in current mathematical and science education	a. Class and online interactive, Socratic discussions b. Electronic Databases Literature Searches c. Quizzes and Exams c. Written Reflections
ALL	Deepen their commitment to their pupils’ learning of mathematics and science	a. Pre/Post Test b. Pre/Post Survey c. Comprehensive Exams d. Written Reflections
ALL	Increase their confidence to teach mathematics and/or science	a. Mini-Teaching Exercise b. Pre/Post Survey c. Written Reflections d. Self and Peer Feedback and Ratings
V, VI	Improve their ability to manage and assess their pupils’ mathematics and science learning. Discover innovative methods of instruction to increase effectiveness and pupils’ engagement, learning, and thinking.	a. Class and online interactive, Socratic discussions b. Quizzes and Exams c. Written Reflections d. Mini-Teaching Exercise
ALL	Improve their capacity to think reflectively and creatively about their teaching of mathematics and/or science.	a. Class and online interactive, Socratic discussions b. Quizzes and Exams c. Written Reflections

		d. Mini-Teaching Exercise
ALL	Increase their capacity to become an agent of change in the field of mathematics and/or science education through effective teaching and communication.	a. Class and online interactive, Socratic discussions b. Lesson Plan Development c. Electronic Databases Literature Searches c. Written Reflections d. Pre/Post Survey
ALL	Develop knowledge and strategies to design curriculum at classroom and school levels.	a. Class and online interactive, Socratic discussions b. Lesson Plan Development c. Electronic Databases Literature Searches c. Written Reflections

**POLICIES:**

**A. Grading Scale**

Excellent	Above Average	Average	Below Average	Failing
A = 90 – 100%	B = 80 – 89%	C = 70 – 79%	D = 60 – 69%	F = 59% and below

Each assignment will be worth “x” number of points and averaged at the end of the semester. Some assignments are weighted more heavily than others. Descriptions of major assignment criteria/expectations are provided in the syllabus. **Estimated Total Possible Points = 400 to 600 Points**

**B. Submission of Assignments**

Assignments are to be submitted through Blackboard Assignment on the date indicated by 11:59 PM. LATE ASSIGNMENTS WILL NOT BE ACCEPTED.

**C. Standards of Academic Integrity**

Students are expected to uphold the highest standards of academic integrity. Any form of scholastic dishonesty is an affront to the pursuit of knowledge and jeopardizes the quality of the degree awarded to all graduates of UTEP. Any student who commits an act of scholastic dishonesty is subject to discipline. Scholastic dishonesty includes, but is not limited to cheating, plagiarism, collusion, the submission for credit of any work or materials that are not attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts. Proven violations of the detailed regulations, as printed in the Handbook of Operating Procedures (HOP) and available in the Office of

the Dean of Students, may result in sanctions ranging from disciplinary probation, to failing grades on the work in question, to failing grades in the course, to suspension or dismissal, among others.

#### **D. Students with Disabilities**

If you have or believe you have a disability, you may wish to self-identify. You can do so by providing documentation to the Office of Disabled Student Services located in Union E Room 203. Students who have been designated as disabled must reactivate their standing with the Office of Disabled Student Services on a yearly basis. Failure to report to this office will place a student on the inactive list and nullify benefits received. If you have a condition which may affect your ability to exit safely from the premises in an emergency or which may cause an emergency during class, you are encouraged to discuss this in confidence with the instructor and/or the director of Disabled Student Services. You may call 747-5148 for general information about the Americans with Disabilities Act (ADA).

#### **E. Equal Educational Opportunity**

In order to create equal educational opportunities in the class, all students are expected to demonstrate respect for the diverse voices and individual differences in the class. Particularly, no person shall be excluded from participation in, denied benefits of, or be subject to discrimination under any program or activity sponsored or conducted by the University of Texas at El Paso on the basis of race, color, national origin, religion, sex, age, veteran status, disability, or sexual orientation. Any member of the University community who engages in discrimination or other conduct in violation of university policy is subject to the full range of disciplinary action, up to and including separation from the University. Complaints regarding discrimination should be reported to the University's Equal Opportunity Office. Inquiries regarding applicable policies should be addressed to the University's Equal Opportunity Office, Kelly Hall, 3rd Floor, 915.747.5662 or [eoaa@utep.edu](mailto:eoaa@utep.edu)<<mailto:eoaa@utep.edu>>.

#### ***Inclusiveness, Diversity, and equity***

Learning happens only when we feel respected as a whole human being. My top priority in our classroom is to cultivate relationships of trust and respect and a sense that we see each other as whole, complex human beings. That you experience this in our classroom is important for the sake of your learning in our course and for the sake of your future students' learning, so that you feel able to cultivate such relationships with them. To that end, I want you to know that all of you is welcome in our classroom space—all the parts of you as a person are welcome in our discussions, our activities, our assignments, and in our assessments. We are all complex people with a variety of perspectives, experiences, challenges, assets, and resources—our gender identities, our sexual orientations, our religions, our races, our ethnicities, our economic statuses, our immigration statuses, our parenthoods, our veteran statuses, our ages, our languages, our abilities, and disabilities. All the parts of you are welcome in our learning community to the extent that you feel comfortable bringing them in. I strive to show respect for the variety and wholeness in each of you, and I expect that each of you shows respect for each other as well. If you feel marginalized in our class, and you feel comfortable discussing it, I would like to know so that I can support you, protect you, and make changes that feel more inclusive and equitable. You can also talk

with our Department Chair and/or you can report a complaint of discrimination to the University’s Equal Opportunity Office, Kelly Hall, Third Floor, 915-747-5662 or [eoaa@utep.edu](mailto:eoaa@utep.edu).

**F. Professionalism**

<b>Participation/Professionalism (50 points)</b>
<ul style="list-style-type: none"> <li>Your participation grade will be based on attendance and on written and oral class activities.</li> </ul>
<ul style="list-style-type: none"> <li>You are expected to attend all synchronous class sessions and to be on time, as your voice and participation are very important to your colleagues.</li> </ul>
<ul style="list-style-type: none"> <li>Also key to the job of the teacher is timeliness in meeting deadlines. All work is expected to be turned in on time.</li> </ul>
<ul style="list-style-type: none"> <li>Absences (over 1), tardies, and/or late work will result in points being deducted from your participation grade. If you must be absent, please let me know in advance. And, obviously, if you are feeling ill, please do NOT come to class. If you feel well enough to Zoom in, please do so.</li> </ul>
<ul style="list-style-type: none"> <li>Missing three or more classes could result in your being dropped from class.</li> </ul>
<ul style="list-style-type: none"> <li>There will be several pieces of work that you will share with your colleagues over the course of the semester. You must bring this work to share with the group when it is your turn to do so—there is no time for make up</li> </ul>

**Assignments in SCED4367/SCED4368:**

**Weekly Assignments**

You will be asked to complete weekly assignments. These assignments will be diverse and may include solving or analyzing tasks, watching a video, analyzing student work, or preparing activities. Completing these assignments is a critical part of your coursework.

<b>Exit Tickets, Engaging Professional Development Tasks, Stop-n-Think Activities (Embedded in Multiple Assignments)</b>			
<b>Category</b>	<b>Exceeds Standard</b>	<b>Meets Standard</b>	<b>Does Not Meet Standard</b>
<b>Points</b>	<b>20-15</b>	<b>14-7</b>	<b>6-0</b>
Prompt(s) are addressed Shows consideration of the topic(s) Mechanics	The piece is thoughtful, engaging, and clearly written. The piece shows careful consideration of the topic at hand. It responds directly to the question or prompts and makes meaningful connections with the readings and course content. The piece has been proofread.	Shows adequate reflection along with some level of thoughtfulness and may or may not have responded directly to the question or prompt. It may contain grammatical or sentence structure errors that disrupt the flow of the narrative.	Does not adequately address the question or prompt and shows limited thoughtfulness

**Game Development/Collaboration (25 points)**

Based on the description of professional develop task #2, *Captivate, Activate, and Invigorate*, collaboratively develop a game to teach a high school Texas Essential Knowledge & Skills (TEKS) standards mathematics/science

concepts <https://tea.texas.gov/academics/curriculum-standards/teks/texas-essential-knowledge-and-skills> (50% of game development grade).

Review/Play two (2) other students' games and provide specific feedback by answering these questions (50% of game development grade):

- How did you feel about the game as a teaching strategy?
- Were you engaged?
- How would you modify/improve the game?
- What evidence supports your answers?

**Final Exam (200 points)**

Goals of the assignment

The goal of the final exam is to measure student knowledge of active learning, learning theories that connect the mathematics and science concepts to concrete and/or real-world examples/activities, as well as the importance of collaboration in problem solving and solution finding.

**Part I** of the exam will consist of multiple-choice, short answer, long answer questions.

**Part II** of the exam will be the lesson plan prepared and taught to your class peers virtually by Cross-curricular teams based on a “Big Idea” and agreed supporting content topics that demonstrate cross-curricular connections. Lesson plan template is on the Blackboard for reference.

Part II Final Exam Assignment directions:

Part 1: Each team will consult virtually (using Blackboard Break-out sessions/Group discussion) to determine the ‘Big Idea’/topic of lesson plan.

Part 2: Each team will virtually prepare a 10-minute lesson that includes active learning lesson materials. Assignment of student cooperative learning roles is essential to ensure active participation of all students in the group. Pacing and time management are critical to the success of the learning centers functionality.

Part 3: Coinciding with your final exam submission, each team member must complete the “Group Members Evaluation Form” located on Blackboard.

Part 4: You must also evaluate your own contribution in completing this assignment (reflection).

Part 5: Submit lesson plan and samples of hands-on activities on Blackboard.

<b>Final Exam Lesson Plan – Part II</b>			
<b>Category</b>	<b>Exceeds Standard</b>	<b>Meets Standard</b>	<b>Does Not Meet Standard</b>
<i>Structure (Tools)</i>	Lesson Plan format is concise and includes Cross-Curricular/Real-world Connections. Tools address types of learners: kinesthetic, visual, and auditory.	Lesson Plan format is somewhat concise and includes most Cross-Curricular/ Real-world Connections. Tools address types of learners: kinesthetic, visual, and auditory.	Lesson Plan format is not concise and does not include Cross-Curricular/Real-world Connections. Tools do not address types of learners: kinesthetic, visual, and auditory.

<i>Content (Tasks)</i>	Texas Essential Knowledge and Skills and Learning objective are stated, and learning processes are clear and concise.	Texas Essential Knowledge and Skills and Learning objective are stated, and learning processes are somewhat clear and concise.	Texas Essential Knowledge and Skills and Learning objective are not stated, and learning processes are not clear and concise.
<i>Lesson Delivery (Strategies)</i>	Strategies for lesson delivery include interactive, hands-on approaches and differentiated instruction. Technology & Inquiry-Based/Active learning is embedded in lesson delivery.	Strategies for lesson delivery include some interactive, hands-on approaches and differentiated instruction. Technology & Inquiry-Based/Active learning is somewhat embedded in lesson delivery.	Strategies for lesson delivery does not include interactive, hands-on approaches and differentiated instruction. Technology & Inquiry-Based/Active learning is not embedded in lesson delivery.
