

Syllabus: QMB 2301

Text Book: **Fundamentals of Business Statistics with Microsoft Office Excel**
Anderson, Sweeney, Williams, Camm, Cochran
Cengage MindTap will be required.

Professor: Robert Wilson
Class Time: T/Th 4:30PM - 5:50PM
Classroom: CBA 309
Prof. Office: CBA 210
Office Hours: 12:00 - 1:00 T/Th in office and using Blackboard's virtual office
Email: rlwilson@utep.edu

This syllabus is preliminary and can change if necessary.

Course Objective: There are 3 primary objectives for the student in this course: to give an understanding of the prevalence of statistical analysis in business, an understanding of introductory statistical techniques and concepts, and become more proficient in Excel.

Attendance Policy: The student is responsible for all material covered in class and the online portal. It is the professor's opinion, belief, and intent that time in the classroom will be instructive and essential in both performing well in the class and understanding the material. Class will be a mixture of both instruction, participation, and problem solving. Persistent tardiness will NOT be tolerated as it disrupts the flow of the class.

Homework Structure: THERE IS NO ALLOWANCE FOR LATE OR MISSING HOMEWORK, AND THERE ARE NO MAKE-UPS. It is the professor's belief that a student should expect to do 1-2 hours of homework a day, depending on Excel skills. I consider homework essential in this class for two reasons. First, in teaching an applied math subject, numerous examples and repetition reinforces the subject matter. Second, homework is the only reasonable method available to teach the student to use Excel in an applied and meaningful manner. The homework often has 2 aspects. The first is problems associated with the previous lecture. The second is Excel problems that are related to the next class lecture. The student is expected to read the material for the upcoming lecture and complete the assigned excel problems. A student that has little or no Excel knowledge should be prepared to spend extra time on the homework, and study groups are encouraged.

Cengage MindTap: MindTap is one of Cengage's online portals and is accessible through Blackboard. It is **REQUIRED** for the class. All homework, including Excel, is assigned through this system. Homework will be made available as the corresponding dates approach. A Cengage representative will be present on the first day of class to help. The professor is not a technology expert - any problems associated with accessing the homework or general computer problems should be dealt with in the following order: 1) going to the UTEP tech center (3rd floor library), 2) creating a ticket with Cengage using online help, and finally, 3) contacting the Cengage representative.

Participation: At random lectures, a group problem will be assigned and collected. The goal of the participation section is to help the student in comprehension and encourage the student to attend class.

Exam Structure: There will be 2 quizzes and a final exam. THERE ARE NO EXCUSED ABSENCES. IF A STUDENT DOES NOT HAVE A LAPTOP TO BRING TO CLASS, IT IS THEIR RESPONSIBILITY TO OBTAIN A "LOANER" LAPTOP FROM THE UTEP COMPUTER CENTER BEFORE THE EXAM. The exams will be multiple choice and use the respondus lockdown browser on blackboard.

Grading Breakdown:	Homework:	35%
	Quizzes (2):	10% each
	Participation	20%
	Final:	25%.

Withdrawal and Incomplete Policy: A student may officially withdraw from this class in accordance with UTEP policy and within the UTEP academic calendar dates. Automatic withdrawals will NOT be made by the instructor. To be withdrawn from the class, students must take the appropriate actions on or before the university deadlines. The policy of the College of Business Administration is that INCOMPLETES are to be given only to students who need additional time to complete the specified assignments of a course. Incompletes WILL NOT BE GIVEN to those students who are not passing the course and wish to retake the course at a later date.

Scholastic Integrity: The University of Texas at El Paso prides itself on its standards of academic excellence. In all matters of intellectual pursuit, UTEP faculty and students must strive to achieve excellence based on the quality of work produced by the individual. In the classroom and in all other academic activities, students are expected to uphold the highest standards of academic integrity. Any form of scholastic dishonesty is an affront to the pursuit of knowledge and jeopardizes the quality of the degree awarded to all graduates of UTEP. It is imperative, therefore, that the members of this academic community understand the regulations pertaining to academic integrity and that all faculty insist on adherence to these standards.

Any student who commits an act of scholastic dishonesty is subject to discipline. Scholastic dishonesty includes, but is not limited to, cheating, plagiarism, collusion, the submission for credit of any work or materials that are attributable in whole or in part to another person, taking an examination for another person, any act designed to give unfair advantage to a student or the attempt to commit such acts. Proven violations of the detailed regulations, as printed in the Handbook of Operating Procedures (HoOP), and available in the Office of the Dean of Students, and the homepage of The Dean of Students (DOS) at www.utep.edu, may result in sanctions ranging from disciplinary probation, to failing grade on the work in question, to a failing grade in the course, to suspension or dismissal, among others.

Statement of Disability: If you feel you may have a disability that requires accommodations, contact the Center for Accommodations and Support Services (CASS) Office at 747-5148, go by Room 106 in the Union Building East, or email cass@utep.edu. Please see me if there are further problems.

Projected Calendar:

Introduction to Data; Displaying Data; Introduction to Numerical Statistical Measures:

Chapter 1: Aug 27 Chapter 2: Aug 29 - Sept 3 Chapter 3: Sept 5 - 10
 Quiz 1: Sept 12 (Covering Chapter 1-3)

Introduction to Probability; Continuous and Discrete Distributions:

Chapter 4: Sept 17 - Sept 24 Chapter 5: Sept 26 - Oct 3 Chapter 6: Oct 8 - Oct 10
 Quiz 2: Oct 15 (Covering Chapter 4-6)

Sampling of Populations; Distributions and Confidence Tests of Samples; Hypothesis Creation

Chapter 7: Oct 17 - Oct 29 Chapter 8: Oct 31 - Nov 12 Chapter 9: Nov 14 - Nov 26

Case Problems and Review: Remainder of Class.

Final: TBD
