COURSE DESCRIPTION and OBJECTIVES:
In this course, students will examine United States history through the periods of pre-
colonization, colonization, Independence, nation-state formation, national expansion, and Civil
War. Thinking critically, students will analyze various primary and secondary sources, interpret
them, and form their own conclusions. In this way, students will learn that writing history
involves a process of analysis, synthesis, and translation in which historians constantly
reinterpret the past. Thinking like historians, students will consider how interpretation,
causation, historical change and context, and various contingencies all shaped historical
outcomes. This course will also introduce students to academic writing through various
exercises in which they will learn about essay structure and formatting. Students will also
consider the experiences of many diverse historical actors, such as Native Americans, European
Americans, and African Americans. Examining history and writing academically, students will
offer their own interpretations of the past in course papers and exams as they learn to think
like historians. This class is part of various Learning Communities that are working in
conjunction with HIST 1301. Some of the readings and assignments in this class will be
integrated with the work you do as learning community members.
