

THE UNIVERSITY OF TEXAS AT EL PASO

College of Education
Educational Psychology and Special Services

**EDPC 5317, Section 01
Human Growth and Development
Fall 2015**

Note: This syllabus may be subject to revision with notification

Contact Information

Instructor: Dr. Sarah Peterson
Office: Education 708
Contact E-mail: We will be using Blackboard email for our primary means of communication; please check your Blackboard email regularly
UTEP E-mail: sepeterson@utep.edu. Use this email in the event that Blackboard is down
Office Hours: Online 9:00 – 11:45; on campus Thursday 1:00 – 3:50; or by appt.
Office Phone: (915) 747-7639

Course Description

Descriptive analysis of the typical patterns of human physical, social, emotional, moral, intellectual, cognitive, and personality growth and development across the lifespan.

Course Rationale

Professional counselors and educators need to acquire knowledge on the process of human growth and development and thereby understand and appreciate how various internal and external factors can influence this process. This foundational knowledge will help you understand later concepts and dynamics that you will learn in other courses and will help you ultimately to better serve your clients as school, agency, rehabilitation, or marriage and family counselors.

Course Structure

This course uses a variety of online assignments and activities that will help you understand and apply course material. These include online class discussions, multiple choice exams, experiential learning groups, written assignments, videos, Blackboard email, course readings, and contextual and cultural materials/experiences that students bring to the class.

Course Objectives/Student Competencies

Objective	CACREP Standard	TEXES School Counselor	Learning Activity	Outcome Measure
Goal: Section II F. 3. The goal is for students to understand human development and factors that influence development across the lifespan.				
Objective 1. Understand the major theories relevant to human growth and development and be able to apply them to individuals and families	F 3 a	Domain I: Competency 1.1	Online learning activities, reading, case study activities, group discussions	Mid-term and final exams; group development paper
Objective 2. Understand the different stages of human growth and development across the lifespan	F 3a, e	Domain I: Competency 1.1	Online learning activities, reading, case study activities, group discussions	Mid-term and final exams; group development paper
Objective 3. Understand normal physical, cognitive, social, emotional, moral, and personality development	F 3c	Domain I: Competency 1.1	Online learning activities, reading, case study activities, group discussions	Mid-term and final exams
Objective 4. Understand theories of learning as they apply to lifespan development	F 3b	Domain I: Competency 1.5 Domain I: Competency 3.1, 3.3	Online learning activities, reading	Mid-term and final exams

Objective 5. Understand factors that affect human development, functioning, and behavior including individual, biological, neurological, physiological, systemic, spiritual, and environmental factors	F 3e	Domain I: Competency 1.3 Domain I: Competency 3.1, 3.3	Online learning activities, reading, case study activities, group discussions	Mid-term and final exams; group development paper
Objective 6. Develop awareness and understanding of one's own personal growth and development		Domain I: Competency 001		

Required/Recommended Course Materials

Required Textbook:

Fiore, L. B. (2011). *LifeSmart: Exploring human development, 1st ed.* New York, NY: McGraw Hill.

ISBN: 978-0077468712 You can purchase a hard copy of this textbook from the UTEP bookstore or online sources such as Amazon. It is also available at a lower price through McGraw Hill Connect as an **e-book** when you sign up for Connect at:

Regardless of which version of the text you choose, you must sign up for McGraw Hill Connect because this is where you will complete many of the learning exercises and take exams.

NOTE: Some students have reported that it is easier for the exams to look up information in the hard copy than the e-book but it is your choice.

Recommended supplemental textbook:

American Psychological Association. (2009). *Publication manual of the American Psychological Association, 6th ed.* Washington DC: American Psychological Association

ISBN-13: 978-1433805615

This is the publication style you will use throughout your education and your career in counseling and related fields. The purchase of this text is optional but strongly recommended, as you will be held to the writing standards and you will need it for other classes. You are required to use APA style for all papers submitted in this class.

Required Videos:

These movies can be purchased or rented from locations such as Blockbuster or similar venues or they can be rented through online sites such as www.netflix.com. They can also be purchased through such venues as amazon.com. It is recommended you watch them several times and take detailed notes as you will need to refer to your notes for the assignments associated with the movies.

The movie "I Am Sam" with Sean Penn and Dakota Fanning must be viewed for the online group discussions (See under assignments).

The movie "My Girl" with Anna Chlumsky and Macaulay Culkin must be viewed for the developmental analysis paper. (See under assignments).

Online Course Navigation

This course will be accessed through UTEP **Blackboard Learn**. Please look at *Course Calendar* at the end of this syllabus for a calendar of all assignments and due dates. These are firm due dates for all assignments and activities that must be met. **No late assignments are accepted unless prior arrangements have been made with the instructor before the due date/time or in cases of extreme emergency.**

McGraw Hill Connect

Many of the assignments for this class will be completed through McGraw Hill Connect. You will need to create an account with McGraw Hill Connect to access this material. Go to the following web address and click the "Register now" button:

<http://connect.mheducation.com/class/s-peterson-human-growth-and-development-edpc-5317-fall-2015>

This is a unique address for:

Human Growth and Development EDPC 5317
Fall 2015

To register for the Student Registration for Connect through Blackboard:

- Sign into your school's Blackboard.
- Go to your instructor's course.
- Go to the "Tools" menu.
- Click on the "McGraw-Hill Education" link.
- Below "My Connect Section", click **Go to My Connect Section**.
- Follow the on-screen instructions to register.

Click on either “*How to register with an access code,*” or “*How to buy access online.*” If you wish to have a hard copy of the textbook, purchase the book with the ISBN# above, and you will also get access to McGraw Hill Connect. If you want to purchase the e-book, it also comes with access to McGraw Hill Connect. See the syllabus for the assignments that are located on McGraw Hill Connect vs. those that are located on Blackboard.

If you have trouble with registration for McGraw Hill Connect, please contact McGraw Hill Connects Customer Support at <http://mpss.mhhe.com/> or call 800-331-5094.

Once you have an account, log in. When you come to the home page for the course, click on the icon that says “*Fall 2015.*” This will take you to the page that contains the learning exercises you will need to complete. Note that at the top of the page there is a notice that asks you to turn off your pop up blocker. You may not be able to view the learning exercises if you do not turn this off. Just below that notice you will see “*Troubleshoot before starting your work. We can check your computer and provide simple fixes.*” If you cannot access the learning exercises, this may be a good way to troubleshoot what might be wrong.

Once you have created your McGraw Hill account, you should access the McGraw Hill exercises directly through the course modules in Blackboard. Clicking on them will take you directly to exercises such as “*Scientific Method,*” “*Designing an Experiment,*” and “*Ethical Dilemmas.*” These are the learning exercises you will complete through the McGraw Hill website. Click on the exercise link that you need and it will take you to the learning exercise. Most exercises consist of: (a) a video you will watch and then answer questions from what you have viewed; (b) interactive exercises to help you apply important concepts; or (c) games you will play to test your knowledge of the concepts. Each exercise has points assigned to it based on difficulty level and/or length of time needed to complete the learning exercise. These point totals are listed under the **Course Calendar** at the end of this syllabus where assignments are listed for each week.

At the end of each course module, you will see a link that has a red brain or LS. These are the Learn Smart Study Modules, one for each chapter. In these modules you will find practice questions for each chapter to help you prepare for the mid-term and final exam, as well as certification and licensure exams. The Learn Smart Study Modules are not required but are highly recommended as a preparation tool for your exams. Students in previous semesters who have completed the modules have scored higher on the exams. In order to encourage completion of the Learn Smart modules, you will receive 5 extra credit points for each chapter in which you complete the Learn Smart Study Module. Each chapter must be 100% completed in order to earn the extra credit; no credit will be given for partial completion of a chapter. Learn Smart modules for Chapters 1 – 6 must be completed before you submit the mid-term exam in order to earn extra credit; Chapters 7 – 13 must be completed before you submit the final exam in order to

earn extra credit. (Note that Blackboard indicates the due dates/times as 10:00 PM the night that the exam is due; however, your personal due dates/times are before you take the exam). The Blackboard grade center does not recognize assignments as extra credit, so the points you earn for the Learn Smart modules are **NOT** reflected in Blackboard. At the end of the semester, I will add these points in and calculate your grade by hand.

From the assignment page you may also access the E-book by clicking on the LifeSmart icon on the right side next to the picture of the textbook. You can also access the E-book from the Library tab at the top of the page. You do not need a hard copy of the text in order to complete this course and you can access the E-book from anywhere you have computer and Internet access. You can also access the E-book if you bought a hard copy of the book.

When you complete each McGraw Hill learning exercise it will automatically be submitted through Blackboard so once you complete it you will be done. If you have difficulty, please contact McGraw Hill at 800-331-5094. They respond more quickly to phone calls than e-mails. They will give you an incident number. E-mail me that you have had a problem and send me the incident number. Then send me their communication with you about how they resolved the problem. If the error is McGraw Hill's, you will get full points for the assignment. If the error was yours, you will only get the points that you earned. You need to present proof that the error was McGraw Hill's in order to get full points, hence it is required to forward me the communication you get from them. If McGraw-Hill tells you that it is a technology issue with your computer, it is your responsibility to resolve this issue. You can always get help with your technology from the UTEP Help Desk. Remember that friends, colleagues, and family members are also a good source of technology help!

UTEP Blackboard

You can access Blackboard by logging in to www.my.utep.edu. It is recommended that you access Blackboard from Firefox or Chrome. Using Internet Explorer creates numerous problems in Blackboard, such as getting kicked out during quizzes and exams, so **DO NOT USE INTERNET EXPLORER**. Once you log in on the home page, click on the Blackboard link and look for the Human Growth and Development class.

Once you enter the class site, on the left of the page you will see a series of tabs you can click on, which include *Course Modules, Announcements, Syllabus, Discussions, Blackboard Email, Technical Support, McGraw – Hill Connect, My Grades, etc.*

Course Modules: Under this link you will access the weekly reading modules for the course as well as other materials for the course, including required reading modules, videos, video transcripts, and assignments. In addition, I may post relevant materials that I think will help you master the course content.

Are you Ready for Online? This link is made available by Blackboard Central at UTEP and will provide a lot of useful information for you, especially if you are not familiar with primarily online courses. Be sure to take time to use this resource.

Syllabus: A copy of the syllabus is accessible here. If there are any changes to the syllabus during the semester I will send you an announcement of the change through the announcement tab or Blackboard email and I will also post a new copy of the syllabus that reflects these changes. Changes are not likely, but I do reserve the right to make changes to address the changing needs of students and the class. Also, in most cases, I will e-mail each of you a new syllabus through your Blackboard e-mail. You are responsible for using the most recent version of the syllabus. *The syllabus includes a timeline of all course modules, assignments, and exams. I strongly recommend that you print it out and refer to it frequently, especially in the event that Blackboard is down. I also strongly recommend that you input due dates into your own personal calendar, whether it is your phone, a tablet, etc. Do not rely on Blackboard to notify you of due dates because I have found it to be unreliable.* One of your first assignments will also require you to send me an email indicating that you have read the syllabus.

McGraw-Hill Connect: This will allow you to link directly to McGraw-Hill to complete the learning exercises and access the Learn Smart study modules. However, I recommend that you always connect to the McGraw-Hill exercises directly from the weekly course modules in order to make sure that your grades get downloaded into Blackboard.

Announcements: This is where I will send you information during the course, if needed. This tab will have a green asterisk within it if there is a new announcement waiting for you. Click on the tab to receive it.

Blackboard E-Mail: This is an internal e-mail system through Blackboard that will be our primary means of communication. You can contact me or other students in the class via this e-mail. This is by far the best way to contact me because all of our correspondence will be documented and your message won't get sent to junk mail in my regular UTEP email, which happens very frequently. *You should only use my regular UTEP email (sepeter@utep.edu) in the event that Blackboard is down.* I will send you important information and updates via Blackboard Email, so you should check it at least several times each week. When using Blackboard email, make sure you pay attention to whether you are sending the message to just one person or to the whole group. This will avoid embarrassing circumstances where personal messages inadvertently get sent to the whole group. Please note that you can use the Blackboard phone app to make the Blackboard email more readily accessible by phone, but I strongly recommend that you do NOT use the phone app to submit assignments because it has been unreliable for some students.

Discussions: If you have any questions on the course material or procedures, first post your question on the discussion board in Blackboard in the forum "*Questions Addressed to the Class.*" Often your classmates can help you with issues that you are trying to resolve. If it is a question that only I can answer, put it in the forum entitled "*Questions for the Professor.*" If you have a personal question concerning your assignments or grades, send me a Blackboard E-mail.

My Grades: This is where you can keep track of your grades. I recommend that you check it frequently in case there are any discrepancies. It is also important to monitor your grades so that you can seek help if you are not maintaining at least a B average. **Please note: I have had several recent experiences with Blackboard calculating grades inaccurately, so you should**

keep track of your own grades as the semester progresses, and contact the instructor if you see discrepancies!

Web Links: I may post links to resources on the Internet that may be of help or of interest to you. Check this often during the semester to view new material. In addition, please pay close attention to the websites recommended in the syllabus in regard to APA style. You MUST use APA style for the paper you submit for this class.

Technical Support: This link has information on how to reach UTEP technical support if you are having difficulty with Blackboard. Please see the customer support info under McGraw Hill in this syllabus or go to the link on the McGraw Hill website if you need assistance with McGraw Hill Connect. UTEP personnel will not be able to help you with McGraw Hill Connect, only Blackboard. If you have a problem with Blackboard, call the UTEP Help Desk at

UTEP HELP DESK

Telephone and Walk-in Support available

Monday-Friday 7AM-8PM

Saturdays 9AM-1PM

Sundays 12PM - 4PM

Telephone: On-Campus extension 4357 (Help) Off-Campus [915-747-5257](tel:915-747-5257)

Email: helpdesk@utep.edu

Location: Library Room 300

If you go to their website at <http://admin.utep.edu/Default.aspx?tabid=63402> you can do a live chat with them. The instructions are the same: if you have a problem with Blackboard, contact UTEP and forward your correspondence with them to me. If the problem is with Blackboard, you will get full points for the assignment. If the problem is on your end, you will get the points you earned.

Do not wait until the last minute to submit an assignment or take an exam in case you run into technical difficulties. You may need to access another computer to finish your assignment. If you wait until the last minute and then experience technical difficulties, your work will not be submitted on time and you will not get credit. Procrastination is not an accepted excuse for an extension!

Important note: You should not plan to take the exams on your personal laptops while connected to UTEP wireless, because it will kick you out after an hour and you won't be able to get back into the exam. If you want to take the exams at UTEP, you will need to actually log onto a computer on the UTEP LAN network (any computer lab).

Student Evaluation

Note: Late assignments will not be accepted unless prior arrangements have been made with the instructor. It is YOUR responsibility to honor assignment deadlines. Because this is an online class you can work on your own time schedule and work around your other obligations and most emergencies. Exceptions may be made in extreme emergencies. You know the due dates from the

beginning of the semester so procrastination is not an excuse. I strongly recommend that you submit assignments early in case of unexpected problems with technology.

McGraw Hill Learning Exercises and Videos

Some modules have exercises and videos that must be completed through McGraw Hill Connect (see course calendar). Exercises are worth varying points. You should access these exercises directly through the weekly course modules on Blackboard. You will get only one attempt to complete these exercises, so make sure you do your best work. You make work ahead on all assignments, but the feedback on objective questions will not appear until one hour after the due date/time. Instructor feedback on short answer/essay questions will be provided only after the due date and time, usually within one week of the due date, even if you work ahead. If you have any questions about your grades on these exercises, contact the instructor via Blackboard email.

Blackboard Exercises

Some modules have exercises that will be completed on Blackboard. You should access these exercises directly through the weekly course modules on Blackboard. You will get only one attempt to complete these exercises, so make sure you do your best work. Feedback will consist of the score you earn on these exercises. If you have any questions about your grades or answers to specific questions on these exercises, contact the instructor via Blackboard email.

Blackboard Discussion Groups for the film “I am Sam”

“Sam” groups will use their group discussion board to discuss the film “*I am Sam.*” After specific theories and domains are discussed the group will apply them to the character of Sam (played by Sean Penn). I will review each group’s discussion after the date it is due and give group feedback to the class regarding your discussions. You can find my feedback on the discussion board titled “Dr. Peterson’s Feedback on Discussions.” Make sure you read the feedback carefully because it will be useful for writing your group paper. Use the terms and concepts of the theory to frame your discussions, and provide specific examples from the movies to support your claims. These online discussions provide practice for your group paper in which you will analyze another movie character, so I strongly encourage you to use the instructions for the group paper to guide your contributions to the group discussions. For example, in your group paper you will be required to provide evidence that the character is in a specific stage of a developmental theory, as well as evidence for why the character is not in a lower or higher stage. Use these instructions to guide and compose your online contributions. Your discussions will be graded using the rubric below. Total points available for all such discussions in the class is 100 points. You will be graded on the quality and timeliness of your contributions to the discussions and knowledge of the theories using the rubric below. Please notice that in order to receive an A on the online discussions you must post your contributions on time unless prior arrangements are made. Unexcused late or missing contributions will result in a significantly lower grade.

These discussions are practice sessions to prepare your “Vada” group to write the group paper on the character of Vada (played by Anna Chlumsky) in “*My Girl.*” Ultimately, these exercises will help you assess a real client’s development in order to tailor counseling interventions that fit the client’s developmental level.

Rubric for Contributions to the Blackboard Discussions				
(F) 59 and less	(D) 60 - 69	(C) 70 - 79	(B) 80 - 89	(A) 90 - 100
Student never makes contributions to the discussion or provides feedback on others' contribution; demonstrates no knowledge of theory.	Student rarely makes timely contributions to the discussion or provides feedback on others' contributions; demonstrates little knowledge of theory.	Student sometimes makes timely contributions to the discussion and provides feedback on others' contributions; demonstrates basic knowledge of theory.	Student usually makes timely contributions to the discussion and provides thoughtful feedback on others' contributions; demonstrates good knowledge of theory.	Student always makes timely contributions to the discussion and provides insightful feedback on others' contributions; demonstrates extensive knowledge of theory.

McGraw Hill Learn Smart Study Modules (optional but highly recommended; 5 points extra credit for completing each chapter 1-6 before the mid-term and chapter 7-13 before final exam)

I strongly recommend that you take advantage of the Learn Smart Study Modules on the McGraw Hill Connect website to help you study for the mid-term and final exam for this class. The Learn Smart Study Modules include practice exams that will also help you learn the material you will need to be successful on your school counseling certification exam (TExES) for school counselors and the licensure exam (NCE) for mental health counselors. You can access these practice exams at the end of each course module – you will see an icon that has a red brain and McGraw Hill or LS. You will see the scores from these modules in your grade center, but they are not factored into your total grade points or percentage because BB doesn't know how to include extra credit points. Instead, at the end of the semester, I will add any extra credit points to your total points and calculate your percentage grade by hand.

Exams

There will be two multiple choice exams, 75 questions each, one mid-term and one final. Each exam is worth 750 points or 10 points per question. You will have two hours to complete the exam through Blackboard. Once you begin the exam you cannot stop the clock so plan to complete the exam in one sitting. Make sure you have a two hour block of uninterrupted time to commit to the exam. It is an open book/open note exam, but *students who study diligently for the exams are much more likely to do well on them*. Most of the questions ask you to apply information and concepts to a case scenario. Very few questions just ask you to identify terms. At the graduate level in the counseling profession, you must know how to apply the theories or concepts to a client. The mid-term exam is on chapters 1-6 and weekly reading modules. The final exam is over chapters 7-13 and all of the reading modules. It is strongly recommended that you take the exam well ahead of the due date and time in case you run into technology problems because late exams will not be accepted unless prior arrangements have been made.

Developmental Analysis Group Paper (1000 points)

You will be assigned to groups of approximately 4 students who will meet online through the discussion board or in person to work on this paper. You are expected to contribute equally to this assignment. Each group member will rate others on their contributions, contact with the group, meeting group deadlines, etc. ***Your peer evaluations will be taken into consideration as a part of your grade on this paper.*** Your group will submit one paper, but each group member will be evaluated individually on his/her section of the paper, so if you don't carry your weight as a group member, it will only affect your grade. Conversely, if you do a great job, but other group members don't, your grade won't be negatively affected by their substandard work.

Each group member will need to view the movie "My Girl" using one of several options. You can purchase or rent it if it isn't available through your TV service. This assignment asks you to integrate the knowledge you have gained from the course and assess the character on major areas of human growth and development. It is also a forum to develop your critical thinking skills. The paper might be approximately 25 pages long (but content is more important than length), written in APA style, demonstrate a critical analysis of human growth and development as applied to the movie character and should be professionally written. Each section of the paper should include at least three citations to professional sources from outside this class in support of your developmental analysis of the character. ***Use information that will help you analyze the character developmentally rather than simply citing a definition or general theoretical idea. Outside sources should supplement your knowledge of human growth and development, providing information that is not available in the textbook or weekly reading modules. These sources should come from professional books, journals or websites ending in .org., .gov., or .edu. Sites ending in .com are not reliable and are not acceptable sources for this paper.***

Your paper should include the following areas of development. Thorough understanding of the theories and content of Human Growth and Development are essential in order to earn a high grade. It is strongly recommended that you make substantive use of the course modules as they provide more extensive information on the theories than the textbook.

Physical Development: Assess the physical development of the character. Find applicable areas in your text and course modules (and from outside sources) to fully describe this area of development. Note things such as height, weight (e.g., is character below average, average, or above average, height/weight proportionate). Note if the character has any physical disabilities or any physical deformities. What are your observations about overall health? In your discussion, compare your observations of the character to the developmental characteristics presented in the textbook and course modules. How does the character compare to or differ from what is considered "normal" in each developmental category for the age group? Be thorough! Development of your thoughts and ideas is more important than page length. Cite sources of your information in support of your conclusions. This is NOT an opinion paper. Base your assessment on facts and cite your sources according to APA style.

Cognitive Development: (You must use **Piaget** but you can also use any other cognitive theorist you wish to discuss, for example Vygotsky, information processing): Gather specific evidence from the movie for the character's cognitive development. Specify the cognitive developmental level that you think best represents the character (e.g., sensorimotor,

preoperational, concrete operational, or formal operational). Give at least four correct, in depth examples/reasons for why you think the character is at this level of cognitive development. Provide at least two correct reasons as to why the character is not in the stage before (if applicable) and why the character is not in the stage after (if applicable). **Note: Use the specific concepts related to the theory to present your findings (e.g., if you are talking about the concrete level, discuss such skills as conservation, logical inferences, reversibility, decentration, and so forth).** Does the character have any obvious cognitive disabilities, learning disabilities, or perceptual disabilities? *If there are none, state this fact.* What are your observations regarding the character's intelligence? Information processing abilities? Creativity? In your discussion, compare your observations of the character to the developmental characteristics presented in the textbook and course modules. How does the character compare to or differ from what is considered "normal" in each of these developmental categories? Development of your thoughts and ideas is more important than page length. Cite sources of your information using APA style in support of your conclusions. This is NOT an opinion paper; base your assessment on facts

Psychosocial/Identity/Temperament Development: (You must address **Erikson, Marcia,** and **temperament** but you can use additional theorists if you choose): Specify the stage of Erikson's psychosocial development at which you assess the character. What is your assessment regarding the character's progress in the stage you have chosen (e.g., successful or is having difficulties)? Give at least four correct, in depth examples/reasons in support of these judgments about the character's psychosocial development. Discuss at least two experiences with crises from earlier stages that seem to be affecting the current stage. Give reasons why you believe this. Give at least two correct, in-depth examples for why the character is not in a higher stage. Specify Marcia's identity statuses in which you observe the character throughout the movie. Do you believe it changes over the course of the movie or does the character remain in the same one? What is the character's temperament style (e.g. easy, difficult, or slow-to-warm-up)? Give examples of why you think so. How do you believe the character would identify temperament? See textbook and course modules for specific areas of psychosocial/personality/temperament development that apply to the character. In your discussion, compare your observations of the character to the developmental characteristics presented in the textbook and course modules. How does the character compare to or differ from what is considered "normal" in each of these developmental categories for the age group? Development of your thoughts and ideas is more important than page length. Cite the sources of your information in support of your conclusions using APA style. This is NOT an opinion paper; base your assessment on facts.

Moral Development: (You must use **Kohlberg** but you can also use other moral theorists you wish to discuss, e.g. Piaget or Gilligan): Specify the stage of Kohlberg's moral development at which you assess the character. Give at least four correct examples/reasons (what the character said or did) that support your assessment. Provide at least two correct in depth reasons as to why the character is not in the stage before the stage you have chosen. Provide at least two correct in depth reasons as to why the character is not in the stage after the stage you have chosen. Use the language and concepts of the theory to discuss your findings (see info above under Cognitive Development for an example of this). In your discussion, compare your observations of the character to the developmental characteristics

presented in the textbook and course content. How did the character compare to or differ from what is considered “normal” in each of these developmental categories for the same age group? Development of your thoughts and ideas is more important than page length. Cite the sources of your information in support of your conclusions using APA style. This is NOT an opinion paper; base your assessment on facts.

Biopsychosocial Development: (You must use **Bronfenbrenner** but you can also use any other biopsychosocial theorists you wish to discuss). Describe the character’s microsystems, mesosystems, exosystem, macrosystem, and chronosystem. *You must correctly discuss all five systems.* How have these systems impacted the character’s development? For example, how has the character’s cultural background impacted him/her? How might the historical period of time in which the character has lived have impacted him/her? Use the language and concepts of the theory to discuss your findings (see info under the section on Cognitive Development for an example of this). How does society view people similar to this character? What laws might apply that impact the character? In your discussion, compare your observations of the character to the developmental characteristics presented in the textbook and course content. How did the character compare to or differ from what might be considered “normal” in each of these systems? Be thorough. Development of your thoughts and ideas is more important than page length. Cite the sources of your information in support of your conclusions using APA style. This is NOT an opinion paper; base your assessment on facts.

NOTE: If you find yourself having difficulty identifying enough examples from the movie, you may write an “out-take” from the movie. In other words, you can create and describe a scene that would have been plausible within the movie and the main character, and then explain how that illustrates a developmental concept you want to identify. For the stage theories, you may create one out-take as an example of the stage you believe the character is in, and you may create one out-take as an example of an earlier or later stage that does not accurately reflect the character. For Bronfenbrenner’s theory, you may create two out-takes to illustrate examples of any two of the major systems. If you decide to use out-takes as examples, be sure to provide enough information about what would have happened to illustrate your accurate understanding of the developmental concept. Also be sure to identify the example as an “out-take.”

You will be checking and submitting your final paper through SafeAssign, a program that checks papers for plagiarism. Your paper must be professionally written and must use APA style to cite references in the text and in the reference list. You do not need to use running heads, abstract, etc. Remember that outside references should provide information not available in your textbook or weekly reading modules, and they should be used in support of your analysis, not simply to offer definitions or ideas that you are not using to analyze the character’s development. **APA style frowns on the use of direct quotes unless absolutely necessary, so please avoid the use of direct quotes. You can always paraphrase others’ ideas, although you must still cite them to give them credit.** You should also use APA to cite the textbook. If you use information from the modules you can cite them as: (Peterson, 2015, course module ____ fill in the blank with a module number). I will grade your paper using the following rubric. Use it as a guide in composing and self-evaluating your paper, based on specific grading criteria. On your paper, indicate which group member had primary responsibility for each section of the paper.

Rubric for Final Paper (Group Assignment)**1000 Points Total**

Criteria	D (60 – 69%)	C (70 – 79%)	B (80 – 89%)	A (90 – 100%)
Theoretical Understanding of Development (20%)	Demonstrates little to no theoretical understanding of area of development for which he/she was responsible	Demonstrates basic theoretical understanding of area of development for which he/she was responsible	Demonstrates proficient theoretical understanding of area of development for which he/she was responsible	Demonstrates excellent theoretical understanding of area of development for which he/she was responsible
Application of Theory to the Character (20%)	Demonstrates little to no application of theory to the character	Demonstrates basic application of theory to the character	Demonstrates proficient application of theory to the character	Demonstrates excellent application of theory to the character
Critical Thinking about Human Growth and Development (20%)	Demonstrates little to no critical thinking about issues of human growth and development and their implications for the character.	Demonstrates basic critical thinking about issues of human growth and development and their implications for the character.	Demonstrates proficient critical thinking about issues of human growth and development and their implications for the character.	Demonstrates excellent critical thinking about issues of human growth and development and their implications for the character.
Support for Hypotheses and Assessment (20%)	Provides little to no support for hypotheses and assessment of character with specific examples from the movie, references from text and course modules, and outside credible sources	Provides basic support for hypotheses and assessment of character with specific examples from the movie, references from text and course modules, and at least three outside credible sources	Provides good support for hypotheses and assessment of character with specific examples from the movie, references from text and course modules, and at least three outside credible sources	Provides excellent support for hypotheses and assessment of character with specific examples from the movie, references from text and course modules, and at least three outside credible sources
Quality of Writing (20%)	Writing contains many grammar and/or syntax errors. Repeated errors interfere with communication of ideas. Vocabulary is inappropriate, vague, or used incorrectly. Professional vocabulary is not used. Ideas borrowed from other sources are not professionally cited. SafeAssign score is above 20%.	Grammar and syntax are usually correct but errors are present. Professional vocabulary is limited but appropriately used. Most thoughts are expressed formally. Ideas borrowed from other sources are not always professionally cited. SafeAssign score is less than 20%.	Writing is formal and professional using APA style. Communication of ideas is clear and accurate. Language reflects correct usage of a professional vocabulary. Ideas borrowed from other sources are professionally cited with a SafeAssign score of less than 15%.	Paper is professionally written using APA style. Communication of ideas is clear and accurate. Language reflects careful choice of words and distinguished professional vocabulary. Ideas from other sources are professionally cited with a SafeAssign score of less than 15%.

Course Points

McGraw Hill Assignments	770 pts
Blackboard Assignments	208 pts
Group Discussion on "I am Sam"	100 pts
Developmental Analysis Group Paper	1000 pts
Mid-Term exam (75 questions)	750 pts
<u>Final Exam (75 questions)</u>	<u>750 pts</u>
Total	3578 pts

Grading Scale

A =	90% -100%	3220 - 3578 points
B =	80% - 89%	2862 - 3219 points
C =	70% - 79%	2505 - 2861 points
D =	60% - 69%	2147 - 2504 points
F =	0% -59%	0 - 2146 points

Note: If you are in the Counseling program you must pass this class with a B or better to progress in the program. This requirement applies to school and community counseling students. Be sure to seek help early and often throughout the semester if you are not averaging a very strong B average. It is too late at the end of the semester to make changes in your study strategies and habits!

Behavioral Expectations for Students:**Course Participation**

All assignments are expected to be completed individually unless directly indicated otherwise (e.g., group paper). In order to meet the objectives outlined for this class, the *active* participation of every student is necessary. You will be expected to participate actively in group activities and post on the discussion board during the semester. Peer evaluations of your contributions will be included in the calculation of your grade.

All assignments must be completed and turned in on time. Students are expected to submit all assignments as scheduled. No assignments are accepted past their due date unless prior arrangements have been made with the instructor. In the case of unexpected emergencies, please contact me as soon as possible to determine if other arrangements can be made. Blackboard and Connect flag any assignments submitted past the due date and time so make sure you allow yourself plenty of time to submit assignments. It is recommended that you complete all assignments well ahead of the due date/time in case you run into any technology problems. It is highly recommended that if you have problems in completing assignments, get a screen capture to document the issue.

You are expected to read the directions for all assignments and complete the assignment correctly. Just as ignorance of the law does not get you out of a ticket, claimed ignorance of what is expected on assignments will not allow you to redo the assignment. If you have a question, ask

me! I usually check my Blackboard e-mail several times daily. There are no dumb or silly questions, so please ask if you are confused. **Your assignments will be graded as submitted.** You will not be able to redo them or add things that were forgotten, etc. ***Proofread your papers carefully and look at the grading rubrics to make sure you covered the criteria upon which you will be graded.*** Don't allow careless mistakes to lower your grade. Use the UTEP Writing Center located in the library if you need help with APA style or in proofing your papers. This is a free service. You can access this service in person at the UTEP library or online through the library webpage.

I strongly recommend that you check the course site at least several times weekly to keep up in this class. Blackboard email messages will come to your Blackboard, so you will want to check it frequently. Any announcements sent to the entire class may also be made through the announcement feature on Blackboard or through your Blackboard e-mail.

There will be no incompletes offered in this course except in extreme or unusual circumstances.
As an online class, you are responsible for completing all assignments on time.

Standards for Professional Student Conduct

You have entered a professional program and therefore it is expected that your behavior will be professional at all times. Students are allowed and encouraged to disagree and have differing viewpoints. All appropriate comments are encouraged! Any classrooms, whether face-to-face or online, are not the place for insulting or insensitive comments, attacks, or venting. Disrespect, prejudice, or hurtful language will not be tolerated. Inappropriate comments and behavior will be subject to disciplinary action up to and including receiving a failing grade in the class.

Students are expected to write at the graduate level. Spell check and grammar check can be helpful but they do not correct all errors. It is your responsibility to proof your papers. If you need assistance with proofing your papers, please contact the UTEP Writing Lab (*see under useful websites*). Upon leaving UTEP you will be expected to prepare client reports and case progress notes. You must write in English at a professional level if you want to be taken seriously in this profession. UTEP has resources available to aid you with professional writing, but it is your responsibility to use those resources.

Academic honesty is expected of all students. Academic dishonesty (including, but not limited to, cheating, plagiarism, and collusion) is considered a violation of the UTEP Handbook of Operating Procedures and will not be tolerated. **Plagiarism** includes: a) failing to cite another's work when you have used that person's ideas; b) copying another's work or just changing a word or two in a passage or phrase (even if you cite it); c) copying another's work without appropriate quotation citation; or d) copying your own work without appropriate citation. **These violations constitute plagiarism whether it is intentional or not.** Make sure that your paper does not contain plagiarism (APA Style Manual, Chapter 1, 1.10, pp. 15-16). Even with citations, you cannot just copy and paste information from an article into your paper and call it your own work. See APA style manual for proper ways to cite information. **Cheating** may involve copying from another student or giving information to another student, or using unauthorized materials during a quiz or test. **Collusion** involves collaboration with another person to commit any academically

dishonest act. Any act of academic dishonesty will be referred to the Dean of Students for review and possible disciplinary action.

The professor will schedule a conference with any student demonstrating (1) signs or symptoms indicative of the possibility of substance intoxication, (2) symptoms or behaviors associated with a significant mental disorder, (3) significant discriminatory verbalizations and/or behaviors related to racial, ethnic, gender, age, or sexual orientation issues, and/or (4) any other resistant, inflammatory, and/or inappropriate behaviors or verbalizations, which could impede his/her or any other student's progress in the course and, which may impair his/her ability to function effectively as a counselor. After considering all options and alternatives, a decision will be made by the professor, who may consult with other departmental faculty and/or the department chair, as to an appropriate course of action to assist the student, to include a determination regarding the student's continued progress in the course and possibly the program. This procedure complies with the Code of Ethics of the American Counseling Association (2005) which requires that "Supervisors (counselor educators) are aware of the limitations of supervisees (students) that might impede performance"; that "Supervisors assist supervisees (students) in securing remedial assistance when needed", that "They recommend dismissal from training programs... when those supervisees (students) are unable to provide competent professional services"; and that "Supervisors (counselor educators) seek consultation and document their decisions to dismiss or refer supervisees for assistance" (Section F.5.b.). **All students enrolled in this course MUST adhere at all times to the 2014 American Counseling Association Code of Ethics.**

Behavioral Expectations for the Professor:

1. I will provide you with clear instructions on class expectations (see detailed information in the syllabus).
2. Unless I notify you otherwise, I will check my Blackboard email at least twice daily from Monday through Friday and will make every attempt to respond to you within 12 hours. I always check Blackboard email on weekends as well but not as frequently, as I reserve the right to family time.
3. For assignments that require scoring, I will provide graded feedback on your performance in a timely manner, usually within 1 week.
4. You can stay informed about your graded progress in the class and I will make time to discuss your needs. You can view your grades at any time through Blackboard. You are expected to look up your own grades on Blackboard. You can determine grades for yourself by comparing your percentage to the standard grading system of 90-100% = A; 80-89% = B; 70-79% = C and so on. Please contact me if you have any questions or believe that your grade is inaccurately recorded.
5. I will consider reasonable and professional suggestions about improvement of the class and class related activities.
6. Even though this is mostly an online class, I am committed to do all I can to ensure your learning and success in this class. It is your responsibility to contact me if you have questions that can be answered via Blackboard email or to schedule phone or personal conferences.
7. If any changes in the course must be implemented, I will ensure that the class is notified in a timely manner.

Being Successful in an Online Class

Online learning is not a spectator sport. It is everyone's responsibility to participate fully in order to get the most from the experience. Here are some simple rules to follow to ensure your participation and engagement in the learning process:

- **Ask questions:** There are no silly questions! If you have a question, others probably have the same question. If you do not know the answer, someone else will. Post your question on the Discussion Board under “**Questions for the Class,**” or “**Questions for the Professor.**”
- **Support the learning of others:** Offer a fact, article, link, or other item that can help others learn.
- **Be professionally appropriate:** The online classroom is not the place for insulting or insensitive comments, attacks, or venting. Inappropriate behavior will usually subject to disciplinary action, as well.
- **Be diplomatic:** When sending messages on emotionally charged topics, make sure you write the message and then walk away for at least an hour before re-reading the message and then sending it. Re-reading emotionally charged messages ensures that they are constructive instead of destructive. Think of the person at the other end.
- **Stay focused:** Stay on topic to increase the efficiency of your learning.
- **Course schedule:** Print out the schedule and keep a copy by your computer in case BB is down or you lose power. I strongly recommend that you also record all due dates in your own personal calendars (phones, iPads, paper calendars – whatever you use to keep track of your life)
- **Use class resources:** Take advantage of all the resources provided to you to succeed in the class. I have listed several helpful websites that will help you with your writing and APA style.
- **Monitor your grades regularly:** Use the gradebook in Blackboard to monitor your grades. If your grade falls below the grade you hope to achieve, you can change your study strategies while there is time to improve. If you wait until the end of the semester, it is too late!
- **Seek help:** If you find that you are not receiving the grades to which you aspire, please contact me or see me during my office hours right away. Again, if you wait until the end of the semester, it is too late!

Effective Electronic Communication: It is important to share a word of caution, so we can become wiser about interpersonal distance learning communications. When communicating electronically, many of the feelings or impressions that are transmitted via body language in face-to-face communications are lost. Consequently, interpreting emotions and innuendos is much more difficult. Only what is written, or drawn, carries the message. Often, excitement can be misinterpreted as anger or insult. It is important that we all keep this in mind as we communicate. Words in print may seem harmless, but they could emotionally injure us when working at a distance. Hence, it is vitally important that we are conscious of how we communicate while working at a distance.

- For example, avoid the use of caps in your electronic messages, as wording in caps comes across as shouting.

The standard practice ("Netiquette") for participation in networked discussion requires that all participation be focused on the topic at hand and be substantive in nature, not become personalized. (Translation: you may certainly disagree with others, but you must do so respectfully; you may express strong beliefs or emotions, but you may not get so carried away that you lose all perspective on the course itself.)

- More information on Netiquette, the etiquette of Internet communication, can be found at www.albion.com/netiquette.

Time Management: The rule of thumb for time planning for a semester-long course is approximately three (3) hours for every credit hour taken. This is a standard figure recommended by American universities. For a 3 credit hybrid course during the regular semester, you should expect to spend 3 hours of "class" time + 9 hours of study and prep time = 12 hours per week. You may not need this amount of time but you should be prepared to devote this amount of time if necessary in order to be successful.

The exercises on Blackboard and McGraw Hill should not take you any longer than the hours you would spend in a face-to-face class per week and many will require less time than that. Just as a lecture in a face-to-face class helps clarify concepts and materials, the readings and exercises you will do on McGraw Hill and Blackboard will help do the same. In addition to these, there is one paper and two exams for this class.

Work steadily toward the assignments for each module rather than trying to complete all of the coursework in a single sitting. Do not leave the assignments for the night or day they are due. This could backfire on you if your computer crashes or freezes or you lose your internet connection. **You are responsible for having access to a working computer to complete all assignments. Leave yourself plenty of time to go to the library or somewhere else if your computer is not working properly.**

Software Requirements:

Remember that it is your responsibility as a student in an online class to have the required technology available. Please note that you can now download a Blackboard app for your phone, but you should not depend on this app to complete your work, as it does not allow successful completion of all of the learning activities in the course. It can be useful, however, to gain more frequent access to your Blackboard email which will be our primary means of communication.

Here are the basics, but you may need additional software to view certain videos.

- Adobe® Reader® is free software that allows everyone from business professionals to home users to easily and reliably view, print, and search PDF files using a variety of platforms and devices.
- Microsoft Office® - This product is available at the UTEP Bookstore for about \$15.00.

- Email tool with file attachment capability. Please use your Blackboard email. In the event that Blackboard is down, you may use your UTEP e-mail account.
 - If you do not have a UTEP e-mail account, please get one immediately. Here is how:
 - Go to <http://newaccount.utep.edu>.
 - Create your account (remember that your date of birth is in the form mm/dd/yyyy: two digits for the month, then day, then year).
 - After you create your account, you must wait 48 hours, then go back to the site and click on "Check on existing account." Enter your UTEP Student ID Number (e.g. 80XXXXXX) and date of birth, and you will get your login name and password. Please let one of us know if you have any difficulty. You may also call the UTEP HELP desk at 1-915-747-5257.
 - The HELP desk hours are given below:

Mon-Fri	7:00am - 8:00pm (Mountain Time)
SAT	9:00am - 1:00pm (Mountain Time)
SUN	CLOSED
- Adobe® Flash® Player is free and can allow for viewing of rich media, such as video or audio, within the course.

Microsoft Word: Please note that newer versions of Microsoft word seem to have a default setting that causes the program to put in an extra space between paragraphs. This is not correct for APA style. APA style is what you will use in this class, in the Counseling and Guidance program, and throughout your career in the social sciences. You will have to manually set your spacing so that it is correct for these purposes. Go to the home screen of your Microsoft Word (note Microsoft Word usually opens in the home screen). About midway across the top of the page you will see some icons that allow you to change various settings. Find the one that says "paragraph" and click on the little box in the right hand corner of that tab. Then find where it says "Spacing." Right below the word "spacing" you'll see where it says "before" and "after" with some drop down boxes. Set both to zero. Often you'll see the number 10 in the "after" box, but this is what sets your program to put in an extra space between paragraphs, which is what we don't want. After you have set both the "before" and "after" to zeros, then find where it says "line spacing" just to the right on the same row. There is a drop down box under this where you can set your line spacing to single space, double space, or multiple space. You should set this to "double space." This should set you up with what you need to have your paper formatted properly for APA style. If you can't figure this out call IT or go to the computer lab on campus for help.

Notice of SafeAssign: This course will utilize third party software that has the ability to automatically detect plagiarism on documents submitted for grading.

Copyright Notice: Many of the materials that are posted within this course are protected by copyright law. These materials are only for the use of students enrolled in this course and only for the purpose of this course. They may not be further retained or disseminated.

Statement for Students with Disabilities: In Section 504 of the Vocational Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) of 1990, if a student needs accommodations then the Center for Accommodations and Support Services (CASS) located at UTEP need to be contacted. If you have a condition which may affect your ability to perform successfully in this course, you are encouraged to discuss this in confidence with the instructor and/or the director of CASS. You may call 915-747-5148 for general information about the American with Disabilities Act (ADA) and the rights that you have as a UTEP student with a disability.

Individuals with disabilities have the right to equal access and opportunity. It is the student's responsibility to contact the instructor and Center for Accommodations and Support Services (CASS) at UTEP.

Technical Assistance: UTEP offers complete technical information and help desk support at:
<http://issweb.utep.edu/techsupport/>.

Course Schedule Changes: As course instructor, I reserve the right to adjust the course syllabus or change assignments as needed and I will do so only if it is in your best interest. I will be sure to give you plenty of notice prior to any changes. Remember that our course syllabus and Course Calendar are living documents and can be changed!

Note: Assignments are due by 11:59 pm (one minute before midnight) on the day they are listed due. Please make note of interim due dates for online discussions. No exceptions unless prior arrangements have been made with the instructor or in cases of emergency, which must be documented!

Course Schedule

Schedule	Module Description	Reading Assignment	Assignments Due NOTE: Our modules will run from Monday 12:00 AM through Sunday at 11:59 PM. Most assignments will be due on Sunday at 11:59 PM (one minute before midnight). Interim due dates are indicated below for posting on the discussion boards (initial posts due on Thursdays at 11:59 PM) and responding to two others' posts (responses to others due Sundays at 11:59 PM).
Intro to Course 8/24 - 8/30			<p>Refer to the Week 1 introductory module on Blackboard (under Course Content) for complete instructions on introductory assignments:</p> <p>Get oriented to Blackboard Learn and register for McGraw Hill Connect (see instructions in syllabus). Explore and navigate both sites to get familiar with outlay of course.</p> <p>Purchase hard copy (with card access to McGraw Hill Connect) or e-copy of LifeSmart textbook.</p> <p>Introduction Assignment and Responses (20 points): See instructions and due dates in Week 1 introductory module on Blackboard.</p> <p>Syllabus/Blackboard Email/Screen Capture Assignment (20 points): See instructions and due date in Week 1 introductory module on Blackboard. Follow these instructions carefully in order to get the full 20 points!</p>
Module 1 8/31 – 9/6	Introduction to Life Span Human Development: How and why (by what methods) we study human development; How traditional views of development have differed throughout history; The importance and role of culture and biopsychosocial interaction on development	Blackboard Learning Module 1 Life Smart Ch. 1	<p>McGraw Hill Exercises: Scientific Method 50 pts Designing an Experiment 40 pts Ethical Dilemmas 50 pts</p> <p>Blackboard: Introduction to Human Growth and Development (reading only, but material will be on the exam so make sure you do read it). No assignments are due on Blackboard for Module 1.</p> <p>Watch the movie “I am Sam” for online discussions beginning next module</p>

<p>Module 2 9/7 – 9/13</p>	<p>Theories of Development: Psychoanalytic Theories Cognitive Theories Behavioral Theories Bioecological Model</p>	<p>Blackboard Learning Module 2 Life Smart Ch. 2</p>	<p>McGraw Hill Exercise: Conservation 70 pts</p> <p>Blackboard: Piaget’s Cognitive Development. Complete the matching exercise 20 pts.</p> <p>Discussion Board for Sam in the movie “I am Sam”: Discuss Piaget in relationship to the character Sam. Discuss the stage of Piaget’s Cognitive Theory you think applies to Sam. Use terms and concepts of the theory to frame your discussion. All discussions will be graded on the quality of your contribution to the discussion and demonstration of theoretical knowledge. Post your own contribution and respond to at least two other group members’ posts. Your first post on Piaget must be completed by <u>Thursday 9/10 at 11:59 PM</u> so that group members can comment on your posts. Your responses to at least <u>two</u> other group members must be completed by <u>Sunday 9/13 at 11:59 PM.</u></p>
<p>Module 3 9/14 – 9/20</p>	<p>Pregnancy and Prenatal Development: Biological basis of development; Hereditary disorders; Fertilization process Fertility issues Prenatal development Prenatal testing Critical Interactions: Biology and environmental influences on development</p>	<p>Blackboard Learning Module 3 Life Smart Ch. 3</p>	<p>McGraw Hill Exercises: Prenatal Development 40 pts</p> <p>Blackboard Discussion on Sam: Discuss Bronfenbrenner’s theory in relationship to the character Sam. Discuss his various systems. Use the terms and concepts of the theory to frame your discussion. Post your own contribution and respond to at least two other group members’ posts. Your first post on Bronfenbrenner must be completed by <u>Thursday 9/17 at 11:59 PM</u> so that your group members can comment on your posts. Your response to at least two other group members must be completed by <u>Sunday 9/20 at 11:59 PM.</u></p>
<p>Module 4 9/21 – 9/27</p>	<p>Birth and the Newborn Child: The birth process Stages in labor and delivery Methods of childbirth Complications and interventions Characteristics of neonates Postpartum adjustment</p>	<p>Blackboard Learning Module 4 Life Smart Ch. 4</p>	<p>McGraw Hill Exercises: Milestones: Expression and Diminishment of Neonatal Reflexes 10 pts</p> <p>Erikson’s Stages of Development 40 pts</p> <p>Blackboard: Erikson’s Psychosocial Development Quiz 20 points.</p> <p>Vada Groups: Group members start to discuss individual observations about Vada in the movie “<i>My Girl</i>.” You may communicate via Vada groups on Blackboard if you choose. Groups begin to outline paper and decide who is writing which part or performing which role.</p>

<p>Module 5</p> <p>9/28 – 10/4</p>	<p>Infancy:</p> <p>Physical development in infancy Neonatal problems Perceptual development Cognitive development Piaget’s Cognitive Theory Language development Vygotsky’s Stages of Language Dev. Social and emotional development Attachment Temperament</p>	<p>Blackboard Module 5</p> <p>LifeSmart Ch. 5</p>	<p>McGraw Hill Exercises:</p> <p>Milestones: Object Permanence 10 pts Emergence of Language 10 pts</p> <p>Blackboard: Attachment Theory, videos and questions 30 points</p> <p>Blackboard Discussion on Sam: Discuss Erikson’s theory in relationship to the character Sam. Discuss the stage of Erikson’s Psychosocial Theory you think applies to Sam. Use the terms and concepts of the theory to frame your discussion. Post your own contribution and respond to at least two other group member’s post. Your first post on Erikson must be completed by <u>Thursday 2/26 at 11:59 PM</u> so that your group members can comment on your posts. Your response to at least two other group members must be completed by <u>Sunday 3/1 at 11:59 PM</u>.</p> <p>Vada Groups: Begin to write paper on Vada in “<i>My Girl</i>.”</p>
<p>Module 6</p> <p>10/5 – 10/11</p>	<p>Early Childhood:</p> <p>Physical and motor development Cognitive development Piaget’s Cognitive Development Vygotsky’s Theory Information Processing Theory Theory of Mind Approaches to early childhood education Language Development The development of a sense of self Social development Gender development Theories of Gender Development The importance of play</p>	<p>Blackboard Module 6</p> <p>Life Smart Ch. 6</p>	<p>McGraw Hill Exercises:</p> <p>Milestones Types of Play 10 pts Scaffolding 10 pts</p> <p>Kohlberg’s Moral Reasoning 50 pts</p> <p>Blackboard: Kohlberg’s Moral Development Questions 20 pts</p> <p>Vada Groups: Continue to write paper on Vada</p>
<p>10/12 – 10/18</p>	<p>Mid-term exam</p>		<p>Due by 10/18 at 11:59 pm – Do NOT wait until the last minute in case you have technology problems. The exam will submit automatically at 11:59 whether you are finished or not.</p> <p>This is an open book/open note exam. You will have two hours to complete it. Once you start, the 2-hour clock starts ticking. You cannot stop this exam and go back to it. You must finish this exam in one sitting. <u>You must study if you want to do well on this exam!</u></p>

<p>Module 7</p> <p>10/19 – 10/25</p>	<p>Middle Childhood:</p> <p>Physical development Cognitive development Piaget’s Cognitive Development Gardner’s Multiple Intelligences Sternberg’s Triarchic Theory Critical thinking and problem solving Moral development Piaget’s Moral Theory Kohlberg’s Theory Gilligan’s Ethics of Care Language development Theories of reading acquisition The changing sense of self Social development</p>	<p>Blackboard Learning Module #7</p> <p>Life Smart Ch. 7</p>	<p>McGraw Hill Exercises: Structure of Neurons 60 pts</p> <p>Blackboard: Brain and Physical Development (Reading only, but material will be on the exam so be sure to read). No assignments are due on Blackboard for Module seven.</p> <p>Blackboard Discussion on Sam: Discuss Kohlberg’s theory in relationship to the character. Discuss the stage of Kohlberg’s Moral Theory you think applies to Sam. Use the terms and concepts of the theory to frame your discussion. Post your own contribution and respond to at least two other group members’ posts. Your first post on Kohlberg must be completed by <u>Thursday 10/22 at 11:59 PM</u> so that your group members can comment on your posts. Your response to at least two other group members must be completed by <u>Sunday 10/25 at 11:59 PM</u>.</p>
<p>Module 8</p> <p>10/26 – 11/1</p>	<p>Adolescence:</p> <p>Physical development Cognitive development Piaget’s Cognitive Theory Information Processing Theory Identity in adolescence Erikson’s Psychosocial Theory Marcia’s Identity Status Theory Hill’s Biopsychosocial Theory Social development Sexual identity Mental health issues</p>	<p>Blackboard Learning Module #8</p> <p>Life Smart Ch. 8</p>	<p>McGraw Hill Exercises: Gardner’s Multiple Intelligences 50 pts Suicide Risk Factors 60 pts</p> <p>Blackboard: Theories of Intelligence (Reading only, but material will be on the exam so be sure to read). No assignments are due on Blackboard for Module eight.</p> <p>Vada Groups: Groups finalize paper on Vada—it is due 11/15. Submit draft to SafeAssign to obtain feedback on plagiarism. You may submit your individual portions of the paper or submit one entire paper as a group.</p>
<p>Module 9</p> <p>11/2 – 11/8</p>	<p>Early Adulthood:</p> <p>Physical development Cognitive development Piaget’s Cognitive Theory Gender and sexuality Social development Levinson’s Theory of Individuation Erikson’s Psychosocial Theory Sternberg’s Theory of Love Fromm: Validation Theory Marriage and the family</p>	<p>Blackboard Learning Module #9</p>	<p>McGraw Hill Exercises: Mate Selection 60 pts</p> <p>Blackboard: Classical Conditioning Matching Questions 8 pts</p>

<p>Module 10</p> <p>11/9 – 11/15</p>	<p>Middle Adulthood:</p> <p>Physical development Cognitive development Information Processing Theory Social Development Levinson’s Seasons of Life Erikson’s Psychosocial Theory Marriage and family Patterns of work Coping with stress</p>	<p>Blackboard Learning Module #10</p> <p>Life Smart Ch. 10</p>	<p>McGraw Hill Exercises: Working Memory 50 pts Positive Psychology 50 pts</p> <p>Blackboard: Operant Conditioning Matching 5 pts Reinforcement/Punishment 15 pts</p> <p>Vada Paper is Due 11/15 by 11:59 pm via SafeAssign in Blackboard</p>
