METHODS OF RESEARCH
-ONLINE-
(August 22nd – Dec 1st)

Each week (except the very first week) starts on Sunday morning (12:01am, MST) and ends on Saturday night (11:59pm, MST), except the last week, which ends on a Thursday.

Instructor: Trinidad Morales III, PhD (please call me 'Trinidad')

Office Location: I do not have a physical office on the UTEP campus, but you can reach me via Blackboard and we can set up a call to discuss your course concerns.

Office Hours: Saturdays and Sundays from 1pm to 3pm (Mountain Time), I will be available to you. You can also make an appointment to speak to me outside of these office hours. Email me in advance and I will call you or speak to you in a dedicated Discussion Board within Blackboard.

Office Phone: I don't have an office phone, but your e-mails go to my cell phone so I can respond quickly.

E-mail address: tmorales1@utep.edu

Class website: Blackboard account (students can start viewing August 23rd)

Course Description: To provide an overview and introduction to methods of research, to assist you with any projects (school or personal) you may be working on and to prepare you for your Master's thesis and PhD dissertation in the near future.

Required Texts/Material:

- Neuman, W. Lawrence. Basics of Social Research: Qualitative and Quantitative Approaches, Third Edition, 2012. Pearson Education Inc. ISBN 0-205-76261-1

- Additional articles may be placed on Blackboard throughout the semester.

- Other Required Material: You will need access to a computer with a high-speed internet connection, a microphone, and speakers.

- You will need to create a YouTube account to upload video(s) you will record via your computer. You can just create one for this class and delete it at the end of the semester. Do NOT use your personal YouTube account/channel, unless you are okay with the class being able to view all other videos that are not related to the course. YouTube accounts are free, all they require is an e-mail address.

Course Goal and Learning Objectives: To understand, apply, discuss, compare, and critically evaluate methods of research in the social sciences.

Grading:

1) Attendance: **THIS IS A MAJOR PART OF YOUR GRADE. EVERY SEMESTER A SMALL NUMBER OF STUDENTS FAIL THE COURSE BECAUSE OF EXCESSIVE ABSENCES. PLEASE REVIEW THE POLICY BELOW AND IF YOU THINK YOU WILL NOT BE ABLE TO ADHERE TO THE POLICY, I STRONGLY SUGGEST YOU DROP THE COURSE.**

For this class, you are required to submit assignments by the deadlines. Although this is a virtual environment, class discussions, assignments, and presentations need to be submitted when due. **NO LATE WORK WILL BE ACCEPTED!** Blackboard will capture time stamps when assignments were submitted to designate an assignment as turned in "on-time" or "late" or "no submission". Assignments turned in after 11:59pm on the day they are due will not be accepted, meaning **NO LATE WORK WILL BE ACCEPTED!** For every two (2) assignments not submitted on the day they are due (and thus, receiving no credit), a student will lose a letter grade. For example, if a student fails to turn in four (4) assignments during the semester and they finish the semester with a B, they will be deducted two (2) letter grades and will finish the semester with a D. Only university sanctioned excuses will be accepted and **MUST BE SUBMITTED TO ME THE DAY YOU RETURN TO CLASS. I WILL NOT ACCEPT THESE LATER IN THE SEMESTER.**

2) Midterm and final: 0% of total grade. No midterm or final, just class discussion, mini-quizzes, and assignments.

3) Class discussion: 30% of total grade. For the first half of the semester, you will be split into groups (the number of students in each group is dependent on how many students are enrolled in the course; as of the beginning of August, I have about 70 students enrolled, which may lead to seven groups with about ten students per group). Once throughout the semester you will be in a group that will lead the discussion. On the week you are in the group leading the discussion, you and your group will be assigned a chapter(s) and/or article(s) to discuss in the class discussion/chat room (Blackboard calls these 'Discussion Boards'). Groups leading the discussion will need to be the first ones to post to the Discussion Board and students not leading the discussion will respond to questions/comments and discussion should ensue for the class topic. 2 points for first week introduction; 10 points for the week your group is leading the discussion; 3 points for each week (6 weeks total) you participate, but do not lead the discussion.

4) Mini-quizzes: 30% of total grade. You will have a mini-quiz on various chapters (I like to jump around so the material is relevant to the lecture and assignments), for a grand total of seven (7) mini-quizzes. The first quiz is worth 2 points. This is to help you view the format of the quizzes and not adversely affect your grade should you do poorly on the first few quizzes. No mini-quiz will be worth more than six (6) points. Keep in mind all material may be on the mini-quiz (book material, lectures, discussion, articles, etc.).

5) Assignments, eighteen (18) in total: 40% of total grade. Throughout the semester you will have various assignments of various weights. I release these assignments (via Blackboard) several days before they are due, and usually with accompanying guides to assist you. Of course, you can always e-mail me with questions.

TOTAL POSSIBLE POINTS: 100

A note about Assignments #16, #17, and #18. While you may be able to calculate your grades throughout the semester, keep in mind you MUST do Assignments #16, #17, and #18 or you will not complete the course. Let's assume you calculate your grades and figure you are in safe territory to earn an A or a B as your final grade with optimum performance on all your class discussion, quizzes and assignments up to Assignment #15. You may assume you do not have to turn in any other assignments and you do not have to do a presentation and/or submit a final paper to keep your A or B final grade. Not submitting Assignments #16, #17, and/or #18 will result in losses of letter grades for each assignment (total loss of three letter grades if all three are not submitted). Assignments must have substance relative to the course. Meaning if your presentation (Assignment #16) consists of you reading from a magazine, you will receive no credit and lose a letter grade. If your final paper (Assignment #18) is your grocery shopping list, then no credit and loss of a letter grade.

Quizzes and assignments are based on the following scale:

A = 89% and above
B = 79% - 88%
C = 69% - 78%
D = 59% - 68%
F = Below 59%

The above grading is curved 1% in your favor. This also applies to your final grade.

University policies (adopted from Sociology professors' syllabi) Students with disabilities: Reasonable accommodations are available for students who have a documented disability. Please notify the professor during the first week of class of any accommodations needed for the course. Late notification may cause the requested accommodations to be unavailable.

Guidelines for Courtesy and Respect: In order to create a positive learning environment for all students in this class, please note we will cover a range of topics in this course. Observing norms of courtesy and openness to diverse perspectives will ensure the class runs in everyone's best interests. Absolutely NO online bullying will be tolerated and let's keep comments "PG-13", which means we can and certainly will have adult conversations.

Due by December 1st- **ASSIGNMENT #18:** Your final paper! Worth 5 points. No late papers accepted after December 1st.

CLASS IS DONE! HOORAY! IT WAS A MARATHON, BUT YOU DID IT! CONGRATS!

Oh, hello there! Yeah, it's a lot of work. But, we're all in this together. The best way to pass this class is simply to keep up. Once you skip an assignment, or skip your reading, you'll quickly fall behind. Not turning in assignments or completing quizzes, or not posting to the discussion board will hurt your grade immensely. If you look at the grade values, they are all low. This is so you can have a bad assignment and not totally ruin your semester average. Students who do the best in this course are the ones who just do everything. They may trip on a few assignments, but they do not get discouraged and keep fixing and turning in their work. If you just look at the syllabus as a whole, yeah, it seems like a ridiculous amount of work. But if you just follow it week by week, day by day, you'll manage. And after 15 weeks, you'll be done. My job is to turn you into good researchers in 15 weeks. I don't want you to leave the class without a clue on how to write a survey. Or how to interview someone. Then I have failed YOU. And I'm always here for you, you can always e-mail me with concerns, questions (just not late at night, I'm 43 years old, I go to sleep around 9:30pm nightly!). This is a marathon, not a race. We'll take a break for Labor Day and a longer break for Thanksgiving break. Just pace yourself, do the work, and you'll get to the finish line in early December.
