Course Description: This course focuses on numbers and operations for prospective elementary and middle school teachers. Topics include place value, whole numbers, rational numbers, signed numbers, arithmetic operations and algorithms, divisibility tests, multiples and factors. The focus is on conceptual understanding, quantitative reasoning, number sense, multiple representations and ways of thinking, mathematical justification and communication, problem solving, connection making and addressing students' common misconceptions and errors.

Course Objectives: Students will

- (a) deepen their conceptual understanding of numbers and operations by explaining why and making connections;
- (b) conceive mathematics as a problem solving endeavor that involves sense-making and thinking; and
- (c) develop the habits of attending to meaning, of analyzing problem situations, and of making conjectures and providing justifications; and
- (d) develop the skills of active reading and understanding mathematical texts.

Course Activities/Assignments: Number sense and mental computation will be emphasized throughout the course. Lectures will be very interactive; therefore, you are required to participate in class. Such participation may include presenting solutions on the board or working cooperatively with others.

Assessment of Course Objectives: Class work and homework will be assessed for completeness; exams and any projects will be scored for correctness.

Course Schedule:	Weeks	Sections	Topic
	1 – 2	1.1 – 1.4	Numbers & Base-Ten System
	3 – 5	2.1 – 2.5	Fractions & Problem Solving
	6 – 8	3.1 – 3.5	Addition & Subtraction
