COURSE DESCRIPTION AND GOALS

Updated 8.23.2021

This course will introduce the students to the study of human cultures in different parts of the World. The course is based on readings about the work of anthropologists, as well as videos and other ethnographic materials. The students will learn about anthropology holistic approach to society and the recent contributions of ethnographic studies. The main goals of the course are:

1- Giving the students a new perspective for looking at the world, and encouraging them to consider that the Western worldview is just one of the many ways to approach human reality.

2- Giving a broad idea of the techniques anthropologists use to study other cultures.

3- Familiarizing the students with the main thematic areas of Cultural Anthropology.

4- Applying anthropological knowledge to real life scenarios that students can experiment in their own lives.

Course Work
Course activities will consist of reading, written discussions posted on discussion boards, and long written assignments. In general, it is expected that the course will require approximately nine hours each week, including reading, exercises, discussions, and all other activities.

Using the Lessons/Reading Guide. The goal of each lesson is to give you a guideline for close, detailed reading of the books; this takes the place of lecture from the professor. Take advantage of it! It will make a big difference in discussion and on your papers, as this level of detail and understanding is what I am looking for. Please note: you do not need to write out answers to the questions (unless that would help you personally) and you do not need to submit the answers to the professor. Instead, you should review the questions before you read each set of pages indicated in the book, and have the questions by your side as you read. Not every question can be answered directly in the reading; some are there to make you think or to point out implications rather than direct statements.

The Midterm - It will also cover your knowledge of concepts that we discuss in class.

Debates- Elaborate a short opinion focused on concepts and topics discussed in class. This is a critical thinking exercise.

Final Ethnographic reflection: The final essay will require you to critique the different social problems (social, economic, political). You will also be required to provide your own interpretation and solutions. I expect you to write a critical account of the different perspectives advanced by the authors we have read and discuss on class.

All the written paper (assignments and final paper) must be written in APA Format 1.5 Times New Roman font and include ACADEMIC references.

Academic Integrity

Plagiarism, cheating and other forms of academic dishonesty are prohibited and will be referred to the Office of the Dean of Students. Students must do their own work on all class papers and exams.

Work submitted formally (i.e., Papers) will be evaluated for content and for standard grammar and style. Contributions to discussions will be permitted somewhat greater deviation from standard practice for formal submission.

Standard practices of academic integrity are required in the course. All material submitted must be the student’s own work. Ideas and expressions cited from the work of others must be credited appropriately. The course will follow the University of Texas at El Paso ’s policies on academic honesty. These policies can be found at the Student Affairs webpage.
