

## CE 5345 – Advanced Physical-Chemical Water Treatment Processes

The University of Texas at El Paso  
Department of Civil Engineering  
Class: Mon & Wed 4:30-5:50 pm, CRBL 304  
CRN: 28732

Instructor: W. Shane Walker, Ph.D., P.E.  
Email: [wswalker2@utep.edu](mailto:wswalker2@utep.edu)  
Office: Engineering A-215  
Phone: (915) 747-8729  
Office hours: Mon & Wed, 2:30-3:30 pm

### Philosophy

I believe that *teaching* and *learning* are interdependent; you cannot have one without the other. You and I are partners and colleagues, working together to help you become a knowledgeable, curious, intrinsically motivated, and confident engineer. I want to help you become a critical thinker with sharpened skills of analysis, evaluation, and synthesis. I incorporate team-based, hands-on projects in all of my courses to help prepare you for professional practice and to help you develop as a more robust and intrinsically-motivated engineer. I have also realized that it is important to provide weekly homework assignments and quizzes, which help students keep up with understanding and applying concepts. Thus, I have implemented a combination of homework assignments, quizzes, and exams.

### Required Text:

**MWH (2012) Water Treatment: Principles and Design, 3rd Ed., Wiley;**

Supplemental Texts:

- Benjamin and Lawler (2013) Water Quality Engineering: Physical & Chemical Treat. Proc., Wiley;
- AWWA (2011) Water Quality & Treatment, 6<sup>th</sup> Ed., Edzwald (ed), McGraw Hill, <https://accessengineeringlibrary.com/browse/water-quality-and-treatment-a-handbook-on-drinking-water-sixth-edition>;
- Green and Perry (2008) Perry's Chemical Engineers' Handbook, 8<sup>th</sup> Ed., <https://accessengineeringlibrary.com/browse/perrys-chemical-engineers-handbook-eighth-edition>
- Davis (2010) Water and Wastewater Engineering, McGraw Hill;
- Viessman et al (2009) Water Supply & Pollution Control, 8<sup>th</sup> Ed., Pearson Prentice Hall.
- Droste (1997) Theory and Practice of Water and Wastewater Treatment, Wiley

### Description and Objectives

This course involves an advanced study of theory and design of physical-chemical water treatment processes, in greater detail than the introduction provided in CE 3342 (Water & Wastewater Engineering), and complementary with CE 5409 (Environmental Engineering Chemistry), CE 5349 (Membrane Filtration and Desalination), and CE 5344 (Biological Unit Operations). Topics include mass-flow balances, reactor models, coagulation/flocculation, settling, adsorption, disinfection, and AOPs.

### Expectations

**Participation:** More than simply attending class, you are invited to *think*, and *participate* in the lectures and discussions. I encourage you to be curious and inquisitive during lectures and discussions.

**Preparedness:** I recommend that you bring the textbook, a personal course notebook, a pen or pencil, a calculator, completed homework assignments, and questions from the homework and assigned reading.

**Punctuality:** You are expected to be on time to class, laboratory exercises, and plant tours. Assignments submitted late will receive half credit.

**Ethics:** In engineering, personal integrity is of utmost importance, especially in the assessment and reporting of environmental conditions. Also, in most cases, it is necessary to work in teams to develop and design optimal solutions to problems and challenges, and it is essential that each team member contribute to the productivity of the team. In this course, I strongly recommend that you complete homework assignments in

teams; in many cases, you will help each other through the solution of difficult problems. My goal for the homework is for you to develop proficiency in the basic application and calculations in design. Thus, every student is accountable for *understanding* the concepts, analysis, and solution. My goal for the projects is for you to have opportunity to apply this theory in a deeper and more meaningful way than homework. Each student is accountable for understanding and *contributing* (equitably) to the team projects. Any student committing plagiarism (*e.g.*, copying another's work without understanding) or any other form of academic dishonesty will be reported to the Dean of Students for disciplinary action (which may include expulsion from the University). For a concise summary of engineering ethics, I have provided here the Fundamental Canons within the [Code of Ethics](#) of the American Society of Civil Engineers (ASCE):

1. *Engineers shall hold paramount the safety, health and welfare of the public and shall strive to comply with the principles of sustainable development<sup>3</sup> in the performance of their professional duties.*
2. *Engineers shall perform services only in areas of their competence.*
3. *Engineers shall issue public statements only in an objective and truthful manner.*
4. *Engineers shall act in professional matters for each employer or client as faithful agents or trustees, and shall avoid conflicts of interest.*
5. *Engineers shall build their professional reputation on the merit of their services and shall not compete unfairly with others.*
6. *Engineers shall act in such a manner as to uphold and enhance the honor, integrity, and dignity of the engineering profession and shall act with zero-tolerance for bribery, fraud, and corruption.*
7. *Engineers shall continue their professional development throughout their careers, and shall provide opportunities for the professional development of those engineers under their supervision.*

### Homework

Homework assignments will be completed through Quest Learning and Assessment (<https://quest.cns.utexas.edu>), a web-based content and homework delivery system maintained by The University of Texas at Austin. Please go to <https://wikis.utexas.edu/display/questla/Obtaining+a+University+of+Texas+EID> for instructions on how to sign up for the Quest system. During the beginning of this course, when you log into Quest, you will be asked to pay \$30 via credit card on a secure payment site (<https://getquest.cns.utexas.edu/students/collegiate-subscriptions>), which goes toward the maintenance and operation of the resource. You can enroll in the homework portal for this course by searching for the CRN (28732) or by clicking this link: <https://quest.cns.utexas.edu/student/elements?courseuser=2905523>

### Quizzes

I will be using a cloud-based student response software by iClicker in class this semester for quizzing and polling. You will need to download the “iClicker Reef (REEF Polling)” app ([Android](#), [Apple](#)) create an iClicker Reef Student account to participate in class using your laptop, smart phone, or tablet connected to the university's Wi-Fi (UTEPSecure) or to your mobile data plan. If you have not used iClicker Reef before, then you can see these instructions: <https://www.utep.edu/technologysupport/Files/docs/iClicker-Reef-Student-Signup-Instructions.pdf> **When creating your account, use your university email address** (username@miners.utep.edu). You will NOT need to purchase a subscription to use iClicker REEF this semester because it is provided to you for FREE. After logging in, click the “plus” button to add a new course, select The University of Texas at El Paso, and then search for CE 5345, and select this course. Note: submitting votes for a fellow student is considered cheating and a violation of the University Honor Code and the Civil Engineering Honor Code. If you are caught voting for another student or have votes in a class that you did not attend, you will be referred to OSCCR for disciplinary action.

### Evaluation

Assessment of your performance in this course will be determined by class attendance and participation, homework, quizzes, and exams. (No make-up exams will be offered.) Your total course average will be computed by the following:

<b>Evaluation</b>	<b>Contribution (%)</b>
Homework	30
Quizzes	10
Midterm Exams	35
Final Exam	25
<i>Total</i>	<i>100</i>

Furthermore, your final course grade will be determined according to the following:

<b>Average (%)</b>	<b>Grade</b>
$\geq 90$	A
80-89	B
70-79	C
60-69	D
$< 60$	F

I reserve the right to modify or augment this grading scheme for the sake of improving the educational effectiveness of this course.

### **Special Accommodations**

The University of Texas at El Paso provides, upon request, appropriate academic accommodation for students with disabilities. For more information, contact the Center for Accommodations and Support Services (<https://www.utep.edu/student-affairs/cass/>).

**Course Schedule**

<b>Class</b>	<b>Day</b>	<b>Date</b>	<b>Topics</b>	<b>Reading</b>
1	W	JAN	22 Fluid mechanics, turbulence, mixing	-
2	M		27 Mass balance and ideal reactors: PFR, CMR	6.1-3
3	W		29 CMRs in series	6.3b
4	M	FEB	3 Chemical equilibrium and kinetics	5.1-5, 6.4
5	W		5 Ideal reactors with reactions	6.5
6	M		10 Tracer tests to exit age distribution	6.6
7	W		12 Modeling non-ideal reactors: DFM/TIS	6.7
8	M		17 Non-ideal reactors with reactions	6.8
9	W		19 PFRs in parallel, Segregated-Flow Model	6.9
10	M		24 Mixing, blending	6.10
11	W		26 Coagulation	9.1-5
12	M	MAR	2 <i>Drinking Water Treatment Plant Tour</i>	<i>Upper Valley WTP</i>
13	W		4 Flocculation	9.6-7
14	M		9 <b>EXAM 1</b>	<b>Ch. 5-6</b>
15	W		11 Exam 1 Review	-
-	M		16 <i>Spring Break</i>	-
-	W		18 <i>Spring Break</i>	-
16	M		23 Mass transfer: diffusion	7.1-3
17	W		25 Interfacial transfer	7.4-6
18	M		30 Operation and enhance. of mass-transfer	7.7-9
19	W	APR	1 Gas-liquid interfacial theory	14.1-4
20	M		6 Air stripping design	14.5-8
21	W		8 Adsorption	15.1-6
22	M		13 <i>Wastewater Treatment Plant Tour</i>	<i>Haskell Street WWTP</i>
23	W		15 <b>EXAM 2</b>	<b>Ch. 9, 7, 14</b>
24	M		20 Disinfection Documentary <i>How we got to now: clean</i>	13.1-9
25	W		22 AOPs with O <sub>3</sub> , H <sub>2</sub> O <sub>2</sub>	18.1-3
26	M		27 AOPs with UV	18.4-5
27	W		29 <i>Wastewater Reuse Treatment Plant Tour</i>	<i>UTEP DPR Pilot</i>
28	M	MAY	4 <b>EXAM 3</b>	<b>Ch. 15, 13, 18</b>
29	W		6 Course Review	-
30	M		11 <b>FINAL EXAM, 4:00pm-6:45pm</b>	<b>(comprehensive)</b>
